IMPORTANT INFORMATION

This Product Disclosure Statement (**PDS** or **Statement**) is a summary of the significant information relating to the First Sentier Geared Australian Share Fund Complex ETF (APIR: PIM7590AU, ARSN: 667151037) (**Fund**). You should consider all of this information for the Fund before making an investment decision to invest in the Fund.

This PDS is issued by The Trust Company (RE Services) Limited ABN 45 003 278 831, AFSL 235150 (**Responsible Entity**) as responsible entity of the Fund. First Sentier Investors (Australia) IM Ltd ABN 89 114 194 311, AFSL 289017 has been appointed by the Responsible Entity as the investment manager of the Fund (**Investment Manager**) and is a member of First Sentier Investors group (**First Sentier Investors**).

This PDS is dated 30 April 2025 (**Issue Date**) and a copy of this PDS was lodged with the Australian Securities and Investments Commission (**ASIC**) on that date. The PDS will be subject to a seven-day exposure period after the Issue Date which may be extended by ASIC for a further period of up to seven days.

The Responsible Entity has made an application to the Australian Securities Exchange (**ASX**) for the quotation of the units in the Fund on the ASX with the exchange ticker: LEVR. If the application is approved, once quoted for trading on the ASX under the AQUA Rules, investors will be able to buy and sell units in the Fund on the ASX. No applications for units offered pursuant to this PDS will be accepted until the exposure period has expired and units in the Fund have been quoted for trading on the ASX.

No representation is made concerning the Fund's quotation on the ASX. Neither ASIC nor the ASX take any responsibility for the contents of this PDS.

The PDS and Target Market Determination (**TMD**) are available from the First Sentier Investors' website at www.firstsentierinvestors.com.au or you can request a paper copy free of charge by contacting the Responsible Entity or the Investment Manager. The information provided in this PDS is general information and does not take into account your personal financial situation or needs. We recommend that you seek financial advice tailored to your personal circumstances before making an investment decision to help you consider the appropriateness of the information in this PDS having regard to your objectives, financial situation and needs, as well as to assist with determining whether you form part of the target market of the Fund.

This PDS is authorised as disclosure for both investors investing directly in the Fund and indirect investors who wish to access the Fund through an investor directed portfolio service (**IDPS**), IDPS-like scheme, a nominee or custody service or any other trading platform authorised by the Responsible Entity (collectively, **Service**). If you are an indirect investor gaining access to the Fund through a Service, the operator of the relevant Service (**Service Operator**) will invest for you and have the rights of an investor in the Fund. Certain provisions of the Fund's constitution (**Constitution**) are not relevant to indirect investors. For example, indirect investors cannot attend investor meetings or transfer units in the Fund. You can request reports on your investments in the Fund from the Service Operator and you should direct any inquiries to them.

The offer of units under this PDS is only available to persons receiving this PDS (electronically or otherwise) in Australia and does not constitute an offer or recommendation in any other jurisdiction, or to any person to whom it would be unlawful to make such an offer. All times quoted in this PDS are Sydney time (unless otherwise specified). A business day is a day that is a trading day for the purposes of the ASX Operating Rules (**Business Day**).

All dollar amounts are in Australian dollars unless otherwise indicated. Neither the Responsible Entity, the Investment Manager, nor any other entity associated with either the Responsible Entity or the Investment Manager guarantees the repayment of capital or performance of the Fund or any specific rate of return from the Fund. Investments in the Fund are not deposits or other liabilities of Mitsubishi UFJ Financial Group, Inc. (**MUFG**) (the ultimate owner of the Investment Manager) or any other entity associated with MUFG.

UP TO DATE INFORMATION

The information in this PDS is up to date as at the Issue Date. However, some information may change from time to time. Information that is not materially adverse to investors may be updated via the First Sentier Investors' website without notice. You can obtain a copy of any updated information free of charge either from the First Sentier Investors' website, by contacting the Investment Manager and requesting a paper copy, or by contacting your Service Operator. If a change is considered materially adverse, the Responsible Entity will provide notice and issue a replacement or supplementary PDS (which will also be available via the First Sentier Investors' website) where required by law.

This PDS contains forward-looking statements. These statements are based on an assessment of present economic and operating conditions and on a number of assumptions and contingencies that are subject to change without notice. These forward-looking statements involve known and unknown risks and uncertainties and other factors which are beyond the control of the Responsible Entity and the Investment Manager. These statements (including estimates) are provided as a general guide only and should not be relied upon as an indication or guarantee of future performance. The Responsible Entity, the Investment Manager and their respective directors or officers do not make any representation, express or implied, in relation to forward looking statements. Past performance is not a reliable indicator of future performance.

Capitalised terms used in this PDS have the meaning given to them in the 'Terms used in this PDS' section at the back of this PDS.

1. Fund features

First Sentier Geared Australian Share Fund Complex ETF	
Marketing name	First Sentier Geared Australian Share Fund Complex ETF
Legal name ¹	First Sentier Geared Australian Share Fund
APIR	PIM7590AU
ARSN	667 151 037
ASX Code	LEVR
Responsible Entity	The Trust Company (RE Services) Limited
Investment Manager	First Sentier Investors (Australia) IM Ltd
Key fund features	
Description	This Fund is suitable for investors seeking long-term capital growth from a portfolio that utilises gearing to increase their exposure to Australian equities. The term “gearing” refers to using borrowed funds in order to increase the amount that can be invested.
Investment objective ²	To magnify long-term returns from capital growth by borrowing to invest in listed Australian equities. The Fund aims to outperform the S&P/ASX 100 Total Return Index (before fees and taxes) over rolling seven-year periods.
Investment strategy	The Fund’s investment strategy is based on the belief that, over the medium-to-long term, stock prices are driven by the ability of management to generate excess returns over their cost of capital in their chosen industry. The Fund seeks to invest in high quality entities with strong balance sheets and earnings. The Fund utilises gearing to magnify returns from underlying investments. The Fund invests in Australian equities and therefore doesn’t hedge currency risk. The Fund does not use derivatives.
Benchmark	S&P/ASX 100 Total Return Index
Minimum suggested investment timeframe for holding the investment	7 years. Please note this is a guide only, not a recommendation.
Asset allocation ³	Australian listed equities: 90 – 100% Cash: 0 – 10%
Gearing ratio	<p>0 – 60%*</p> <p>Gearing can be expected to magnify both investment gains and losses, and consequently increases the volatility of the Fund’s investment returns. For example, if the Fund’s gearing ratio is 60%, this means that, for every \$1.00 invested in the Fund, an additional \$1.50 will be borrowed to invest.</p> <p>*The gearing ratio (Gearing Ratio) is the Fund’s borrowings on any day (adjusted for any dividends to be received by the Fund and the value of unsettled trades) divided by the total market value of the assets of the Fund, expressed as a percentage. The Fund has a gearing range of 0-60%, with the typical range being between 50-60%. This range is merely an indication of the typical Gearing Ratio of the Fund. The actual Gearing Ratio of the Fund may differ. No additional borrowing is anticipated when the Gearing Ratio is at 55% or above.</p> <p>Please refer to section 3 ‘About the First Sentier Geared Australian Share Fund Complex ETF’ for more information on how gearing works and section 7 ‘Risks of investing in the Fund’ for more information on the risks associated with gearing.</p>
Standard Risk Measure ⁴	6
Risk level ⁵	<p>High</p> <p>The likelihood of the capital value of your investment going down over the short term is high compared to funds investing in lower-risk assets such as fixed interest assets or cash.</p>
Net asset value (NAV)	<p>The NAV of the Fund is calculated by deducting the total value of the liabilities of the Fund from the total market value of the assets of the Fund. The NAV is calculated each Business Day for the preceding Business Day.</p> <p>The NAV per unit is calculated by dividing the NAV by the total number of units on issue in the Fund. The NAV per unit published on a particular Business Day reflects the value of the unit at the close of trading on the previous Business Day. The NAV per unit published on a particular day that is not a Business Day reflects the same value of the unit as published on the previous Business Day. Please refer to section 4 ‘How the Fund works’ for more information on the NAV per unit.</p>
Indicative NAV	<p>An indicative NAV per unit (iNAV) will be calculated by the iNAV provider appointed by the Responsible Entity (iNAV Provider) and is an estimate of the NAV per unit based on real time price movements in the assets of the portfolio during a Business Day. The iNAV will be published throughout the Business Day on the First Sentier Investors’ website at www.firstsentierinvestors.com.au.</p> <p>The iNAV is calculated based on a portfolio of assets that is indicative of the portfolio as at the opening of trading on the ASX on the relevant Business Day based on quotes and last sale prices, less any liabilities of the Fund. Please refer to section 4 ‘How the Fund works’ for more information on the iNAV.</p>

Buying or selling units

You can invest in the Fund by:

- applying for units directly with the Responsible Entity by completing an initial or additional application form which is available from the Registry on request (by contacting Investor Services) or via the online application process (as applicable); or
- buying units on the ASX.

You can withdraw from the Fund by:

- making a request to withdraw directly with the Responsible Entity by submitting a withdrawal form; or
- selling units on the ASX.

The method by which you invest in the Fund does not limit the method by which you can withdraw from the Fund. However, you may be required to first Convert your units (as applicable). Please refer to 'Converting your units' in section 5 'How to invest and withdraw from the Fund' for more information.

If you apply for units directly with the Responsible Entity you will likely pay a different price for units in the Fund than if you were to buy units on the ASX at the exact same time. Similarly, if you withdraw units directly with the Responsible Entity you will likely receive a different price than if you were to sell the units on the ASX at the exact same time. These differences may result in a different return for the same investment in the Fund at the same time.

Please refer to section 5 'How to invest and withdraw from the Fund' for more information on the differences between applying for and withdrawing units directly with the Responsible Entity and buying and selling units on the ASX.

Liquidity on the ASX

You can buy and sell units on the ASX in the same way as any ASX listed securities. Under the AQUA Rules, we have certain obligations in respect of the Fund to facilitate an orderly and liquid market. The Responsible Entity has appointed a market maker(s) to provide market making activities by placing buy and sell orders for units on the ASX and also to provide liquidity to investors on the ASX by acting as a buyer and seller of units on the ASX (**Market Maker(s)**).

The Market Maker(s) and Authorised Participants may create or cancel units by applying for or withdrawing its net position in units bought or sold on the ASX on any Business Day. The liquidity provided by the Market Maker(s) and Authorised Participants will ultimately be constrained by day-to-day events such as, but not limited to, their continuing ability to create and cancel units.

Please refer to section 7 'Risks of investing in the Fund' for more information on the risks associated with market making.

There may be circumstances where withdrawals from the Fund are suspended in accordance with the Constitution or where the Fund is not liquid as defined under the Corporations Act. In those cases, the units may continue to trade on the ASX provided the Responsible Entity complies with the AQUA Rules. The Responsible Entity or the ASX may seek a trading halt if the Responsible Entity or the Fund cease to comply with the AQUA Rules. Alternatively, there may be circumstances where the ASX suspends trading of units in the Fund and investors may continue to withdraw directly with the Responsible Entity (via the Registry), provided withdrawals have not also been suspended by the Responsible Entity in accordance with the Constitution.

Please refer to 'Restrictions on withdrawals' and 'Suspensions' in section 4 'How the Fund works' for more information.

Risks

All investments are subject to risk. There are certain risks associated with an investment in the Fund. The key risks include (but are not limited to) the following:

- **ASX trading price risk** – The price at which investors may buy and sell units on the ASX may differ materially from the NAV per unit or the iNAV of the Fund.
- **Company risk** – Changes in a company or its business environment may affect the value of the Fund's security holding and subsequently the value of the Fund.
- **Counterparty risk** – Risk that counterparties fail to meet their contractual obligations which may result in the investment activities of the Fund being adversely affected.
- **Gearing risk** – The risk that through borrowing, the Fund experiences losses that exceed the value of the Fund's assets.
- **Market risk** – Investment returns are influenced by the performance of the markets as a whole. Certain events may have a negative effect on the price of all types of investments within a particular market.

This is not a summary of all the risks of making an investment in the Fund. Please refer to section 7 'Risks of investing in the Fund' for information on the risks of investing in the Fund.

Fees and costs⁶

Management fees and costs

0.95% p.a. of the total asset value (**TAV**)⁷ of the Fund, comprised of:

1. Management fee: 0.95% p.a.⁸ of the TAV of the Fund;
2. Recoverable expenses: 0.00% p.a.⁹ of the TAV of the Fund; and
3. Indirect costs: 0.00% p.a. of the TAV of the Fund

Total management fees and costs are estimated to be 2.38% p.a. of the NAV of the Fund.⁷

Transaction costs

Estimated to be 0.00% p.a.¹⁰ of the NAV of the Fund

Buy/sell spread

+0.25%/-0.25%¹¹

Change to Fund details

The Responsible Entity may close or terminate the Fund and make changes to the Fund's investment objective, benchmark, asset classes and allocation ranges at any time, in some cases, without prior notice. The Responsible Entity will inform unitholders of any material change to the Fund.

1. Fund name as registered with ASIC.

2. The investment objective is not intended to be a forecast. It is merely an indication of what the Fund aims to achieve over the longer term on the assumption that equity markets remain relatively stable throughout the investment term. The Fund may not be successful in meeting this objective. Returns are not guaranteed.

3. The asset allocation is a range. Actual allocations can change within the ranges significantly and sometimes quickly.
4. Based on Australian Prudential Regulation Authority guidance and Standard Risk Measure Guidance Paper For Trustees issued July 2011 by the Financial Services Council and The Association Superannuation Funds of Australia.
5. The risk level is not a complete assessment of all forms of investment risks, for instance it does not detail what the size of a negative return could be or the potential for a positive return to be less than the return an investor may require to meet their objectives.
6. Unless otherwise stated, all fees, costs and expenses in this section are based on information available at the Issue Date. As the Fund was not offered from at least 11 months before 30 June 2024, costs and expenses reflect the Responsible Entity's reasonable estimates as at the Issue Date of those costs and expenses that will apply for the financial year ended 30 June 2025 (adjusted to reflect a 12-month period).
7. The TAV of the Fund is the NAV of the Fund (being the assets less liabilities) plus the value of assets acquired with the borrowing, adjusted for any dividends to be received by the Fund and the value of unsettled trades. The management fee shown is based on the Fund's management fee of 0.95% p.a. charged on its TAV, which equates to a management fee of 2.38% p.a. of the Fund's NAV based on a maximum Gearing Ratio of 60%. However, this representative NAV figure may be more or less depending on the actual Gearing Ratio. Please refer to 'Additional explanation of fees and costs' in section 8 'Fees and other costs'.
8. The Responsible Entity may negotiate rebates or waive all or part of its fees for certain wholesale clients in accordance with the Corporations Act. Please refer to 'Additional explanation of fees and costs' in section 8 'Fees and other costs' for more information.
9. The Responsible Entity may decide to pay abnormal expenses incurred in managing the Fund out of the Fund, in addition to payment of the management fees. Please refer to 'Additional explanation of fees and costs' in section 8 'Fees and other costs' for more information.
10. As the Fund was not offered from at least 11 months before 30 June 2024, the transaction costs reflect the Responsible Entity's reasonable estimate as at the Issue Date of transaction costs that will apply for the financial year ended 30 June 2025 (adjusted to reflect a 12-month period).
11. The buy/sell spread is current as at the Issue Date and is applied to applications and withdrawals directly with the Responsible Entity. Investors buying or selling units on the ASX may instead be subject to a bid/ask spread. Please refer to 'Buy/sell spread' and 'Bid/ask spread' in the 'Additional explanation of fees and costs' in section 8 'Fees and other costs' for more information.

2. About the Responsible Entity and the Investment Manager

The Responsible Entity

The Trust Company (RE Services) Limited (**Responsible Entity, our, we or us**) is the responsible entity for the Fund and the issuer of this PDS. The Responsible Entity is a wholly owned subsidiary of Perpetual Limited ABN 86 000 431 827 (**Perpetual**), and a part of the Perpetual Group (comprising Perpetual Limited and its subsidiaries, including the Responsible Entity) which has been in operation for over 135 years. Perpetual is an Australian public company that has been listed on the ASX for over 55 years.

The Responsible Entity holds Australian Financial Services Licence number 235150 issued by ASIC, which authorises it to operate the Fund.

The Responsible Entity is bound by the constitution of the Fund (**Constitution**) and the *Corporations Act 2001 (Cth)* (**Corporations Act**). The Responsible Entity has lodged a compliance plan with ASIC which sets out the key measures which the Responsible Entity will apply to comply with the Constitution and the Corporations Act (**Compliance Plan**).

The Investment Manager

The Responsible Entity has appointed First Sentier Investors (Australia) IM Ltd as the Investment Manager of the Fund. Under the Investment Management Agreement (**IMA**), the Investment Manager agrees to provide investment management services for the Fund in accordance with the investment strategy set out in this PDS.

First Sentier Investors

First Sentier Investors is a global asset management group focused on providing high quality, long-term investment capabilities to clients. It brings together teams of specialist investment managers who share its common commitment to responsible investment principles.

First Sentier Investors is a stand-alone asset management business and also home to a number of individually branded investment teams, such as AlbaCore Capital Group, FSSA Investment Managers, Igneo Infrastructure Partners, RQI Investors and Stewart Investors.

All investment teams operate with discrete investment autonomy, according to their investment philosophies. Together, First Sentier Investors offers a comprehensive suite of investment capabilities across global and regional equities, cash and fixed income, listed and unlisted infrastructure and listed property, all with a shared purpose to deliver investment success.

First Sentier Investors has been managing money with a long-term outlook for more than 30 years on behalf of institutional investors, pension funds, wholesale distributors and platforms, financial advisers and their clients. First Sentier Investors is ultimately owned by MUFG, one of the world's largest financial services companies.

Please refer to 'Other service providers' in section 11 'Other information' for information on other key service providers appointed by the Responsible Entity in relation to the Fund.

3. About the First Sentier Geared Australian Share Fund Complex ETF

About the Fund

The Fund is structured as a unit trust that is a managed investment scheme under the Corporations Act and is registered with ASIC. When you invest in the Fund, you will be allocated a certain number of units and your money will be pooled together with other unitholders' money. This pool of money will be used to acquire investments that will be managed on behalf of all unitholders. Unitholders do not have day to day control over the operation of the Fund.

The Constitution allows the Responsible Entity to issue different classes of units. Different classes of units generally represent different levels of rights and interests. Currently, there is only one class of units on issue in the Fund.

Investment objective*

To magnify long-term returns from capital growth by borrowing to invest in listed Australian equities. The Fund aims to outperform the S&P/ASX 100 Total Return Index (before fees and taxes) over rolling seven-year periods.

*The investment objective is not intended to be a forecast. It is merely an indication of what the Fund aims to achieve over the longer term on the assumption that equity markets remain relatively stable throughout the investment term. The Fund may not be successful in meeting this objective. Returns are not guaranteed.

Investment strategy

The Fund's investment strategy is based on the belief that, over the medium-to-long term, stock prices are driven by the ability of management to generate excess returns over their cost of capital in their chosen industry. The Fund seeks to invest in high quality entities with strong balance sheets and earnings. The Fund utilises gearing to magnify returns from underlying investments. The Fund invests in Australian equities and therefore doesn't hedge currency risk. The Fund does not use derivatives.

How gearing works

The Fund is a geared fund, which means that the Fund borrows money to increase the amount the Fund can invest.

Gearing can be expected to magnify both investment gains and losses, and consequently increases the volatility of the Fund's investment returns. For example, if the Fund's gearing ratio is 60%, this means that, for every \$1.00 invested in the Fund, an additional \$1.50 will be borrowed to invest.

Example of gearing

Below is an example showing the way in which gearing can affect investment gains and losses in comparison to a fund that is not geared.

	Geared	Ungeared
Initial investment	\$4,000	\$4,000
Fund gearing level	60%	Nil
Amount borrowed by the Fund	\$6,000	Nil
Amount invested in the market	\$10,000	\$4,000
If the value of the Fund's assets rises by 10%		
Rise in value of the Fund's assets	\$1,000	\$400
Value of Fund assets	\$11,000	\$4,400
Outstanding loan	\$6,000	Nil
Value of investment	\$5,000	\$4,400
Gain on investment	\$1,000	\$400
Return	25%	10%
If the value of the Fund's assets fall by 10%		
Fall in value of Fund's assets	-\$1,000	-\$400
Value of Fund assets	\$9,000	\$3,600
Outstanding loan	\$6,000	Nil
Value of investment	\$3,000	\$3,600
Loss on investment	-\$1,000	-\$400
Return	-25%	-10%

The example is provided for illustrative purposes only and is not intended to be indicative of the actual performance of the Fund. The example also excludes any borrowing costs which would have the effect of reducing returns, whether positive or negative.

How the gearing is managed

The Fund uses a Prime Broker, which provides cash lending services to implement the Fund's gearing strategy. Cash is lent from the Prime Broker to the Responsible Entity on behalf of the Fund at a predetermined rate which is reviewed on a regular basis.

Gearing Ratio

0-60%

The Gearing Ratio is the Fund's borrowings on any given day (adjusted for any dividends to be received by the Fund and the value of unsettled trades) divided by the total market value of the assets of the Fund, expressed as a percentage. The Fund has a gearing range of 0-60%, with the typical range being between 50-60%. This range is merely an indication of the typical Gearing Ratio of the Fund. The actual Gearing Ratio of the Fund may differ. No additional borrowing is anticipated when the Gearing Ratio is 55% or above. The Gearing Ratio may change daily due to changes in the value of the assets of the Fund, and applications and withdrawals (for example, increases in the value of the Fund's assets will generally reduce the Gearing Ratio while decreases in the Fund's assets will generally increase the Gearing Ratio). If these changes cause the Gearing Ratio to exceed 60%, the Gearing Ratio will be reduced within a reasonable period of time by repaying part of the borrowings through inflows or selling some of the Fund's assets. The Gearing Ratio is monitored daily within a pre-determined range with an aim to optimise it, subject to the cost of borrowing being adequately covered by net income.

Based on a typical Gearing Ratio between 50-60%, the Fund's gearing exposure is anticipated to vary between 200% and 250% of the Fund's NAV on a given day. However, the compounding investment returns over time and the effects of rebalancing the Fund's investment exposure to maintain this typical gearing exposure will mean that the return earned by unitholders over any period longer than a day will not necessarily be equivalent to 200% to 250% of the return of the S&P/ASX 100 Total Return Index over the period. This effect on returns over time can be expected to be more pronounced the more volatile the S&P/ASX 100 Total Return Index is and the longer a unitholder's holding period.

Please refer to section 7 'Risks of investing in the Fund' for more information on the risks associated with gearing.

Please refer to 'Other service providers' in section 11 'Other information' for more information on the Prime Broker arrangements.

4. How the Fund works

Investing in the Fund

Investors can invest in the Fund by:

- applying for units directly with the Responsible Entity by completing an initial or additional application form which is available from the Registry on request (by contacting Investor Services) or via the online application process (as applicable); or
- buying units on the ASX.

To understand the differences between applying and withdrawing units directly with the Responsible Entity (via the Registry) or buying and selling units on the ASX, please refer to the table in section 5 'How to invest and withdraw from the Fund'.

Generally, for investors applying for units directly with the Responsible Entity (via the Registry), the NAV per unit is calculated each Business Day for the preceding Business Day. The NAV per unit is calculated by taking the total market value of the assets of the Fund less the total value of the liabilities of the Fund, divided by the total number of units on issue in the Fund at the relevant valuation time.

The Responsible Entity determines the Fund's NAV per unit based on the most recent valuation of assets, property and liabilities (which are determined at regular intervals appropriate to the nature of such assets, property and liabilities). The Fund's NAV per unit will change as the market value of assets in the Fund rises or falls.

There may be a difference between the application and withdrawal price for the Fund quoted on any Business Day which is referred to as the buy/sell spread. The buy/sell spread is applied to ensure that other unitholders aren't impacted by the transaction costs associated with a particular unitholder applying or withdrawing units in the Fund.¹

The NAV per unit will be available at www.firstsentierinvestors.com.au. If any management activities cause the last reported NAV per unit to move by more than 10%, the Investment Manager will promptly disclose this to the ASX.

The Responsible Entity has a documented unit pricing policy (**Unit Pricing and Valuation Policy**) in relation to the guidelines and relevant factors taken into account when calculating unit prices, including all transaction costs and buy/sell spread. You can obtain a copy of the Unit Pricing and Valuation Policy, and records of any exercise of such discretions under the Unit Pricing and Valuation Policy, free of charge, by contacting the Responsible Entity or the Investment Manager.

1. Refer to section 8 'Fees and other costs' for the Fund's buy/sell spread.

iNAV for the Fund

The Responsible Entity has engaged an iNAV Provider to calculate the iNAV for the Fund. The iNAV is an estimate of the NAV per unit based on real time price movements in the assets of the portfolio during a Business Day. The iNAV will be published throughout the Business Day on the First Sentier Investors' website at www.firstsentierinvestors.com.au.

The iNAV is calculated based on a portfolio of assets that is indicative of the portfolio as at the opening of trading on the ASX on the relevant Business Day based on quotes and last sale prices, less any liabilities of the Fund.

No assurance can be given that the iNAV will be published continuously or that it will be up to date or free from error. To the extent permitted by law, neither the Responsible Entity nor the iNAV Provider shall be liable to any person who relies on the iNAV. The price at which units are traded on the ASX may not reflect either the NAV per unit or the iNAV. Please refer to 'iNAV risk' in section 7 'Risks of investing in the Fund'.

Distributions

A Distribution Reinvestment Plan (**DRP**) has been established in relation to distributions for the Fund. A copy of the DRP is available free of charge from the First Sentier Investors' website at www.firstsentierinvestors.com.au. The Responsible Entity may also in accordance with the terms of the DRP (as supplemented or amended) cancel or suspend distribution reinvestments or modify the terms by which distribution reinvestments are permitted.

The Fund intends to pay distributions half-yearly. The distributions are calculated based on the Fund's distributable income at the end of the distribution period and paid to unitholders in proportion to their unitholding. Regardless if you hold your units on the Issuer Sub-Register (with a Securityholder Reference Number (**SRN**)) or CHESS Sub-Register (with a Holder Identification Number (**HIN**)), your distributions will be automatically reinvested as additional units, unless you advise otherwise.

Unitholders can elect to have their distributions paid into their nominated Australian bank account at any time (by contacting Investor Services).

In the instance where distributions are reinvested and such distribution would result in a fractional unit:

- where the distribution relates to units held on the Issuer Sub-Register, you will be issued with whole and fractional (if applicable) units; or
- where the distribution relates to units held on the CHESS Sub-Register, you will only be issued with whole units. In this case, the distribution will be rounded down to the nearest whole number of units and any remaining distribution will be accumulated in a distribution credit balance and carried forward to the next distribution period. For example, if:
 - Distribution credit balance (brought forward from previous period): \$6
 - Distribution amount in relation to units held on the CHESS Sub-Register for the current period: \$55
 - Reinvestment price per unit: \$10
 - The current distribution and the distribution credit balance (\$55 + \$6 = \$61/\$10 per unit) will result in a total reinvestment of 6 new units issued to you to be held on the CHESS Sub-Register with the remaining \$1 carried forward in distribution credit balance to be applied for subsequent reinvested distributions.

You also have access to any distribution credit balance you may have in the following circumstances:

- when you sell all of your units held on the CHESS Sub-Register on the ASX, you will be paid out in cash any distribution credit balance you may have at that time; or
- when you Convert all of your units held on the CHESS Sub-Register to the Issuer Sub-Register, you will be paid out in cash any distribution credit balance you may have at that time.

No interest will be payable on the distribution credit balance.

There is no buy/sell spread with reinvestment of distributions. The issue of units in respect of a reinvested distribution will be at the ex-distribution unit price as at the last day of the calendar month of the distribution period.

Indirect investors

The Responsible Entity authorises the use of this PDS for investors who wish to access the Fund indirectly through a Service. An investment in the Fund through a Service does not entitle you to a direct interest in the Fund and you may be subject to different terms and conditions from those referred to in this PDS. When you invest via a Service, you are investing indirectly in the Fund and as such you do not become a unitholder in the Fund. The Service Operator is the unitholder and the term 'unitholder' as used in this PDS refers to those entities. Some information in this PDS may be relevant only for direct investors. If you invest via a Service you will not receive reports or other documentation from the Responsible Entity or the Investment Manager in respect of the Fund. Instead, these will be provided to you by your Service Operator, who is the unitholder in the Fund. This includes information in relation to applications/withdrawals, cooling-off periods, processing times, distributions, fees and expenses and taxation. You should contact the Service Operator for details on how to invest in or request a withdrawal from the Fund.

Transferring your units

If you hold units in the Fund on the Issuer Sub-Register, you can generally transfer some or all of your units to another person in such a manner and subject to such conditions as required by law or the Constitution, or that the Responsible Entity, from time to time, prescribes. The Responsible Entity is not obligated to register a transfer that does not meet these conditions.

You can sell units in the Fund held on the CHESS Sub-Register on the ASX via your broker.

The Responsible Entity recommends that you obtain your own professional advice regarding your position before transferring some or all of your investment, as tax and social security laws are complex and subject to change, and unitholders' individual circumstances may vary. Please contact the Responsible Entity for further information about transferring units.

For indirect investors, you should contact your Service Operator if you wish to transfer your units.

Restrictions on withdrawals

If the Fund is not liquid under the Corporations Act, withdrawals from the Fund will only be possible if the Responsible Entity makes a withdrawal offer in accordance with the Corporations Act. The Responsible Entity is not obliged to make such an offer. However, if the Responsible Entity does make such an offer, you are only able to withdraw your investment in accordance with the terms of a current withdrawal offer. If an insufficient amount of money is available from the assets specified in the withdrawal offer to satisfy withdrawal requests, the requests will be satisfied proportionately amongst those unitholders wishing to withdraw from the Fund. Under the Corporations Act, the Fund is regarded as liquid if liquid assets account for at least 80% of the value of the assets of the Fund. Liquid assets generally include money in an account or on deposit with a bank, bank-accepted bills, marketable securities and property of the kind prescribed under the Corporations Act.

In circumstances where the Fund is liquid, if the Responsible Entity receives one or more withdrawal requests on a withdrawal date (as defined in the Constitution) which exceeds 20% of the units in the Fund (or units in a class), the Responsible Entity may reduce each withdrawal request pro-rata so that only 20% of the units in the Fund (or units in a class) are withdrawn as at the relevant valuation time (as defined in the Constitution).

Where you seek to dispose of your units by selling on the ASX, you will not be able to sell if trading in the units is suspended or there are insufficient buyers and the Market Maker(s) and Authorised Participants are not able or is not obligated to buy your units.

Please refer to the 'Suspensions' section for details regarding when the Responsible Entity can suspend withdrawals.

Suspensions

The Responsible Entity may at any time suspend the acceptance of applications, withdrawal requests, the withdrawal of units and/or the payment of withdrawal amounts if the Responsible Entity believes that it is in the best interest of unitholders as a whole if:

- it is desirable for the protection of the Fund;
- the Responsible Entity reasonably estimates that it must sell 5% or more of the assets of the Fund to meet current unmet withdrawal requests;
- it suspects or is advised that payment of a withdrawal amount may result in a contravention of Anti-Money Laundering (**AML**) requirements;
- any relevant financial, stock, bond, note, derivative or foreign exchange market (including the ASX) is closed or trading on any such market is restricted in any way; or
- an emergency (including an emergency caused by a mechanical or electronic malfunction such as computer, settlement or clearing system malfunction or impairment) or such other circumstances exist and as a result:
 - it is not reasonably practicable for the Responsible Entity to acquire or dispose of assets of the Fund or determine the application or withdrawal price fairly;
 - the ability of the Responsible Entity to acquire or dispose of assets of the Fund or determine the application or withdrawal price fairly is, or may be, significantly adversely affected;
 - sufficient assets of the Fund cannot be realised at an appropriate price in a timely manner or on adequate terms or otherwise; or
- market conditions are such that the facilitation of withdrawal requests is difficult, not desirable or impossible (for example, there is restricted liquidity or suspended trading in a market for assets, the quotation of any units ceases, is suspended or the

trading of any units is otherwise halted, interrupted or restricted by the ASX, the trading of any units on the ASX is subject to a period of deferred settlement, the trading of any units on the ASX is subject to a consolidation or division or the Fund is removed from the ASX);

provided that, where the Responsible Entity has already accepted a withdrawal request, the Responsible Entity may only suspend the period for payment of the withdrawal amount to which the withdrawal request relates where the particular circumstances requiring the need to suspend that payment were not reasonably foreseeable by the Responsible Entity at the time the withdrawal request was accepted.

A withdrawal request lodged during any period of suspension will be deemed to have been received immediately after the period of suspension and withdrawing unitholders will receive the next calculated unit price.

Generally, the Responsible Entity pays withdrawal proceeds to your bank account. In certain circumstances the Responsible Entity is permitted under the Constitution to pay withdrawal proceeds in kind (i.e. in specie) to unitholders.

5. How to invest and withdraw from the Fund

The Fund is structured to allow investors to apply and withdraw units directly with the Responsible Entity (via the Registry), or once the units are quoted for trading on the ASX, by buying and selling units on the ASX.

The method by which you invest in the Fund does not limit the method by which you can withdraw from the Fund. However, you may be required to first Convert units before withdrawing or selling units (as applicable). Please refer to 'Converting your units' later in this section for more information.

The following table sets out the differences between applying and withdrawing units directly with the Responsible Entity (via the Registry) or buying and selling units via the ASX.

	Buying units on the ASX	Applying for units directly with the Responsible Entity
How do I make an investment in the Fund?	<p>You can purchase units in the Fund via your broker. Only whole number of units may be purchased on the ASX (fractional units are not supported on the ASX). Your purchase of units will be settled via the CHES settlement service, generally two Business Days following your purchase.</p> <p>You do not need to complete the initial application form or the online application process (as applicable).</p>	<p>You can invest in the Fund directly by completing an initial or additional application form which is available from the Registry on request (by contacting Investor Services) or via the online application process (as applicable), providing the relevant identification documents (as required) and making payment in accordance with the payment instructions provided.</p> <p>The cut-off time for receipt of application requests by the Registry is 1pm on any Business Day. Requests received after the cut-off time on a Business Day will generally be treated as having been received before the cut-off time on the next Business Day.</p> <p>The Responsible Entity can accept or reject any application for units at its discretion and is not required to give any reason or grounds for such a refusal. The Registry will not process any application that is incomplete or that is not accompanied by the required identification documents or payment of application money.</p> <p>Application money will be held in a non-interest bearing bank account until invested in the Fund or returned to you.</p>
What is my purchase price when I make an investment in the Fund?	<p>Your purchase price will be the price at which you have purchased units on the ASX.</p> <p>Your broker will provide a transaction confirmation informing you of the purchase price.</p> <p>The price at which you buy units on the ASX may not reflect the NAV per unit or iNAV and is the price at which units are offered for sale on the ASX. The price may be at a premium or discount to the NAV per unit of the Fund.</p> <p>You may incur brokerage fees and commissions when you buy units on the ASX. You should consult your broker for further information on the fees and charges that will apply.</p>	<p>Your purchase price will be the application price applicable for the Business Day on which your application is accepted and processed.</p> <p>The application price reflects the NAV per unit adjusted for the buy spread. The NAV per unit is calculated by dividing the NAV by the total number of units on issue in the Fund.</p> <p>If the Registry receives your completed application by 1pm on a Business Day and cleared funds by the close of business on the same Business Day, if accepted, your application will be processed that Business Day, using the NAV per unit next calculated after 1pm for that applicable Business Day.</p> <p>Applications received after the cut-off time on a Business Day will generally be treated as having been received before the cut-off time on the next Business Day. The application price may differ from the price at which units may be purchased on the ASX. The application price may be at a premium or discount to the price at which units may be purchased on the ASX.</p>
Is there a minimum initial application amount, minimum additional application amount or minimum number of units I need to purchase?	<p>There is no minimum application or investment amount or minimum number of units when purchasing units on the ASX.</p>	<p>The minimum initial application amount is \$20,000.¹</p> <p>No minimum additional application amount applies.</p> <p>Where permitted under the terms of an Authorised Participant agreement, the Responsible Entity may apply a higher minimum initial application amount and minimum additional application amount for an Authorised Participant.</p>

1. We may accept amounts less than the minimum at our discretion if we are satisfied the applicant otherwise qualifies to invest with us.

	Selling units on the ASX	Withdrawing units directly with the Responsible Entity
How to withdraw my investment in the Fund?	<p>You can sell units in the Fund via your broker. Only whole number of units may be sold on the ASX. The sale of your units will be settled via the CHES settlement service, generally two Business Days following the sale.</p> <p>You do not need to submit a withdrawal form.</p> <p>To sell on the ASX, you must hold your units on the CHES Sub-Register and provide your HIN. If you do not hold your units on the CHES Sub-Register, you can Convert your units to the CHES Sub-Register so that you may sell those units on the ASX.</p>	<p>You may request to withdraw some or all of your units from the Fund by submitting a withdrawal form, which is available from the Registry on request (by contacting Investor Services) and should be sent to the Registry for processing. To withdraw directly with the Responsible Entity, you must hold your units on the Issuer Sub-Register and provide your SRN. If you do not hold your units on the Issuer Sub-Register, you can Convert your units to the Issuer Sub-Register so that you may withdraw those units directly with the Responsible Entity. The cut-off time for receipt of withdrawal requests by the Registry is 1pm on any Business Day. Requests received after the cut-off time on a Business Day will generally be treated as having been received before the cut-off time on the next Business Day.</p> <p>While the Fund is liquid, withdrawals will usually be paid into your nominated bank account within seven Business Days. However, the Constitution allows the Responsible Entity up to 21 days to pay withdrawal requests after the next valuation time following receipt of the withdrawal request. If withdrawals are suspended or restricted, withdrawal requests may not be processed within the usual period. Any decisions whether to process withdrawals or partial withdrawals will be made in the best interests of unitholders as a whole and in accordance with the Constitution and Corporations Act.</p> <p>Please refer to 'Converting your units' section below and 'Restrictions on withdrawals' and 'Suspensions' in section 4 'How the Fund works' for further information.</p>
What is my exit price when I sell my units in the Fund?	<p>Your exit price will be the price at which you have sold your units on the ASX.</p> <p>Your broker will provide a transaction confirmation informing you of the exit price.</p> <p>The price at which you may sell units on the ASX may not reflect the NAV per unit or iNAV and is the price at which units are offered for sale on the ASX. The price may be at a premium or discount to the NAV per unit of the Fund.</p> <p>You may incur brokerage fees and commissions when you sell units on the ASX. You should consult your broker for further information on the fees and charges that will apply.</p>	<p>Your exit price will be the withdrawal price applicable for the Business Day on which your withdrawal is accepted and processed. The withdrawal price reflects the NAV per unit adjusted for the sell spread. The NAV per unit is calculated by dividing the NAV by the total number of units on issue in the Fund.</p> <p>If the Registry receives your completed withdrawal request by 1pm on a Business Day, if accepted your withdrawal request will be processed that Business Day, using the NAV per unit next calculated after 1pm for that Business Day. Withdrawal requests received after the cut-off time on a Business Day will generally be treated as having been received before the cut-off time on the next Business Day. Generally, the Responsible Entity pays withdrawal proceeds to your nominated Australian bank account. In certain circumstances the Responsible Entity is permitted under the Constitution to pay withdrawal proceeds in kind (i.e. in specie) to unitholders.</p> <p>The withdrawal price may differ from the price at which units may be sold on the ASX. The withdrawal price may be at a premium or discount to the price at which units may be sold on the ASX.</p>
Is there a minimum withdrawal amount or minimum number of units I need to withdraw?	<p>There is no minimum withdrawal amount or minimum number of units when selling on the ASX.</p> <p>There is no minimum account balance.</p>	<p>You can withdraw all or some of your units in the Fund held on the Issuer Sub-Register. No minimum withdrawal amount applies. The minimum account balance is \$20,000. The Responsible Entity reserves the right to waive this requirement and allow balances below \$20,000. Should the withdrawal bring your account balance below \$20,000, the Responsible Entity reserves the right to facilitate a full withdrawal of your account.</p> <p>Where permitted under the terms of an Authorised Participant agreement, the Responsible Entity may apply a higher minimum account balance for an Authorised Participant.</p>

Incomplete or rejected applications

The Responsible Entity accepts no responsibility for applications that have been sent to an incorrect address or for funds that are paid to an incorrect account. You (or your Service Operator) are responsible for ensuring that the application is completed correctly and contains the correct contact details. Your application may be delayed or not processed if you:

- do not provide the information requested;
- provide incomplete or inaccurate information;
- send your application to an incorrect address;
- pay your application money to the wrong bank account; or
- pay an application amount that varies from the information provided.

The Responsible Entity will not be liable to any prospective investor for any losses incurred, including from market movements, if an application is rejected or the processing of an application is delayed.

Converting your units

You will need to contact your broker should you wish to Convert your units. You may Convert your units in the following scenarios:

- You hold units on the Issuer Sub-Register (with an SRN) and you would like to Convert some or all of your units to the CHESS Sub-Register so that you may sell them on the ASX. A HIN will be issued to identify your holding of units on the CHESS Sub-Register. You may only Convert whole units, and any fractional units remaining after the Conversion will be cancelled and become property of the Fund.
- You hold units on the CHESS Sub-Register (with a HIN) and you would like to Convert some or all of your units to the Issuer Sub-Register so that you may withdraw those units directly with the Responsible Entity. An SRN will be issued to identify your holding of units on the Issuer Sub-Register. Before the Conversion is completed, you may need to provide additional information relating to your identity to enable us to meet our AML Requirements and any other relevant requirements to hold units on the Issuer Sub-Register. If this information is not provided, future withdrawal payments may be delayed.

The Responsible Entity may in its discretion not accept or process a Conversion where it considers it to be in the best interests of investors to do so.

Where units are held through a Service, you will need to request that Service to facilitate any Conversion of your units. The ability to Convert units for investors using a Service may not be available. You should seek financial and tax advice prior to making any decision to Convert units to understand any tax implications for you in doing so.

6. Benefits of investing in the Fund

Significant features

The Fund utilises gearing to invest in a selection of Australian entities that the Investment Manager believes are demonstrating strong growth potential and are expected to generate positive returns on capital. The aim of gearing is to invest more capital and to provide greater exposure to the Fund's investments.

Significant benefits

Investing in the Fund offers investors exposure to:

- a geared portfolio of equity securities that may be difficult for some investors to access with the ability to borrow at institutional rates;
- an actively managed portfolio of high quality Australian entities that the Investment Manager believes, having regard to a range of financial and non-financial metrics, have strong balance sheets, earnings growth and high or improving returns on invested capital;
- an investment approach that involves both detailed industry analysis and stock research to fully understand the drivers of both earnings growth and returns on invested capital;
- a disciplined and structured investment approach that seeks to deliver outperformance through the full investment cycle;
- a Fund that is managed by an investment team with an average investment experience of more than 20 years; and
- the ability to acquire or withdraw units directly with the Responsible Entity or via the ASX.

7. Risks of investing in the Fund

Risk level

The Fund is assigned a risk level which aims to assist the investors to compare funds in the context of the likely number of negative annual returns expected over any 20 year period. This measure, known as Standard Risk Measure (**SRM**), is based on APRA guidance and the Standard Risk Measure Guidance Paper For Trustees, issued July 2011 by the Financial Services Council and The Association of Superannuation Funds of Australia. The table below outlines the different levels of risk as defined by the SRM. The risk level is not a complete assessment of all forms of investment risks, for instance it does not detail what the size of a negative return could be or the potential for a positive return to be less than the return an investor may require to meet their objectives. Further, it does not take into account the impact of fees and tax on the likelihood of a negative return.

Investors should ensure that they are comfortable with the risks and potential losses associated with the Fund. The SRM for the Fund is 6.

Risk band	Risk label	Estimated number of negative annual returns over any 20 year period
1	Very low	Less than 0.5
2	Low	0.5 to less than 1
3	Low to medium	1 to less than 2
4	Medium	2 to less than 3
5	Medium to high	3 to less than 4
6	High	4 to less than 6
7	Very high	6 or greater

Risks of the Fund

All investments are subject to risk. There may be loss of principal, capital or earnings and different strategies carry different levels of risk depending on the assets that make up the strategy. Assets with the highest long-term returns may also carry the highest level of short-term risk generally due to their large fluctuations in returns. Selecting the investments that best match your investment needs and timeframe is crucial in managing this risk.

When considering your investment decision, it is important that you understand the risks that can affect the value of your investment. The value of your investment will vary. The level of returns will vary and future returns may differ from past returns. Returns are not guaranteed. You may receive back less than your original investment when you withdraw from the Fund or you may not receive income from the Fund during a specific period. There is also a risk that laws affecting managed investment schemes may change in the future. The appropriate level of risk for you will vary, depending on a range of factors, including your age, investment timeframes, other investments and risk tolerance levels. Your financial adviser can help you determine whether the Fund is an appropriate investment based on the above factors. The Responsible Entity has set out below a list of significant risks that may affect your investment in the Fund as well as general risks that apply to an investment in a managed investment scheme. It is not always possible to completely eliminate these risks, however it is possible to manage their impact on the Fund through prudent monitoring of the factors giving rise to these risks.

These risks are not exhaustive and there could be other risks that may adversely affect the Fund.

Risk of the Fund	
ASX suspension risk	Investors will not be able to buy and sell units on the ASX during any period that the ASX suspends trading of units in the Fund or if trading is halted by the Responsible Entity because of market conditions or for other reasons such as a failure by the Market Maker to make a market.
ASX trading price risk	The price at which investors may buy and sell units on the ASX may differ materially from the NAV per unit or the iNAV of the Fund.
Company risk	An investment in equities or corporate bonds (if applicable) is exposed to risks due to changes in that company or its business environment. Changes to operations and/or management, legal proceedings involving the company, and profit and loss announcements may affect the value of the Fund's security/bond holdings and subsequently the value of the Fund.
Conversion risk	There may be a delay in processing the Conversion of units between the Issuer Sub-Register and the CHESS Sub-Register, and vice versa. This may delay the processing of a withdrawal request made directly with the Responsible Entity or the sale of units on the ASX, until the Conversion has completed.
Counterparty risk	Risk that counterparties, such as brokers, fail to meet their contractual obligations which may result in the investment activities of the Fund being adversely affected.
Cyber risk	There is a risk of fraud, data loss, business disruption or damage to the information of the Fund or to unitholders' personal information as a result of a threat or failure to protect the information or personal data stored within the IT systems and networks of the Responsible Entity or other service providers.
Equities risk	Equity securities are subject to changes in value, and their values may be more volatile than those of other asset classes.
ESG risk	The realisation of any applicable environmental, social and governance (ESG) related commitments and targets (if any) that are incorporated into the investment process of the Fund is dependent on the accuracy of information provided by portfolio companies and their future actions (for which the relevant portfolio company is responsible and accountable), and which is subject to change or may otherwise be inaccurate. Accordingly, there is a risk that portfolio companies do not achieve their stated ESG objectives which in turn may affect the realisation of any applicable ESG-related commitments and targets that are incorporated in the investment process of the Fund (if any).
Fund risk	<p>Fund risk refers to specific risks associated with the Fund and includes:</p> <ul style="list-style-type: none">– changes to the investment team, which may affect the Fund's future performance;– the termination of the Fund;– the possibility of different outcomes when investing in the Fund rather than investing directly in the assets of the Fund;– the risk that costs of your investment may increase due to an increase of fees and costs in the Fund; and– closing the Fund to further investments if, for example, the Responsible Entity considers it appropriate given the investment objective and investment strategy of the Fund. <p>As a result of these risks, the value of the investment in the Fund and level of distributions may change.</p>
Gearing risk	<p>The Fund is a geared fund, which means that the Fund borrows money to increase the amount the Fund can invest. Gearing can magnify gains and always magnifies losses from a fund's investment. There is a risk that the Fund experiences losses that exceed the value of the Fund's assets. Gearing increases the volatility of a fund's investment returns. Consequently, a geared fund is considered to have a higher investment risk than a comparable fund that is ungeared. The returns of a geared fund depend on the types of investments in it as well as the level of gearing and the costs of borrowing, including interest rates.</p> <p>An increase in the Fund's cost of borrowing (which may result from an increase in interest rates or an increase in the borrowing rate charged by the Fund's Prime Broker) will, all else being equal, reduce the Fund's returns. If the underlying investments of the Fund experiences low positive returns, a geared exposure may also underperform due to the impact of borrowing costs. The greater the level of gearing, the greater the potential for loss of capital. The Gearing Ratio may change daily due to changes in the value of the assets in the Fund and may not be within the Fund's typical gearing range. For example, increases in the value of the Fund's investment portfolio will generally reduce the Gearing Ratio, while decreases in the value of the investment portfolio will generally increase the</p>

Risk of the Fund

Gearing Ratio. Applications or withdrawals in the Fund may also result in changes to the Gearing Ratio.

There is a risk that the Fund will not be able to provide geared exposure continuously or at all, or at the level the Investment Manager considers desirable. The Prime Broker may have the right to reduce the gearing level and in the event that default occurs under the financing arrangements, the Prime Broker may call for repayment or terminate financing arrangements and to enter into possession of and sell the assets of the Fund to satisfy all money that the Fund is liable to pay to the Prime Broker under the Prime Broker Agreement (PBA). This means that the Fund may need to promptly sell assets, which may force the sale of assets at unfavourable prices. Any of these circumstances would likely have a negative impact on the value of the Fund's investments if they were to arise.

iNAV risk

The iNAV published for the Fund is indicative only and might not be up to date, may incorporate securities for which there are no live prices at the time of calculation, or might not accurately reflect the underlying value of the assets of the Fund. The iNAV may differ from the ASX trading price.

Interest rate risk

Risk that the investment value or future returns of an asset of the Fund may be adversely impacted either directly or indirectly by changes in interest rates. An increase in interest rates will cause the cost of borrowing to increase.

Investment sanctions risk

Regulations, restrictions and sanctions may be imposed by governments or international bodies (such as the United Nations) which may impact investments held by the Fund. Sanctions may result in:

- limits on the amount and type of assets that may be purchased by the Fund;
- restrictions to the sale and timing of sanctioned assets or devaluation of such assets within the Fund;
- refusal of sanctioned persons purchasing assets; and/or
- unitholders in the Fund who become sanctioned being restricted from trading in units in the Fund.

Liquidity risk

Liquidity risk refers to the difficulty in selling an asset for cash quickly without an adverse impact on the price received. Assets such as securities in large listed companies are generally considered liquid, while 'real' assets such as direct property and infrastructure are generally considered illiquid. Under abnormal or difficult market conditions some normally liquid assets may become illiquid, restricting the Investment Manager's ability to sell them and to make withdrawal payments or process switches (if applicable) for unitholders without a potentially significant delay.

Market risk

Investment returns are influenced by the performance of the markets as a whole. Certain events may have a negative effect on the price of all types of investments within a particular market. These events may include changes in economic, social, technological or political conditions, as well as market sentiment, the causes of which may include changes in governments or government policies, political unrest, wars, terrorism, pandemics and natural, nuclear and environmental disasters. The duration and potential impacts of such events can be highly unpredictable, which may give rise to increased and/or prolonged market volatility.

Market Maker and Authorised Participant risk

The Responsible Entity has an obligation to facilitate an orderly and liquid market in units of the Fund on the ASX and has appointed at least one Market Maker to assist it in doing so. One or more Authorised Participants may also be engaged to support market making activities. While the Responsible Entity will monitor the Market Maker's compliance with the requirements under the ASX Operating Rules to place buy and sell orders for units in the Fund, there is no guarantee of liquidity in the trading of units, particularly if there is a failure by a Market Maker to make a market and there is no active trading by Authorised Participants. There may be circumstances where a Market Maker is unable to fulfill its market making obligations. Under the ASX Operating Rules, market making operations may be suspended (these are called "Permitted Circumstances"), including if the Market Maker's normal operating environment has been interrupted so that it is prevented from placing orders. Other circumstances where a Market Maker might be unable to fulfil its market making obligations include where the Market Maker is subject to a particular regulatory requirement or if such market making obligations would cause the Market Maker to breach applicable laws or other regulatory rules. There may be a limited number of intermediaries that act as Market Makers and Authorised Participants in respect of the Fund and there is no obligation on an Authorised Participant to place buy and sell orders to support market making activities. To the extent that Market Makers appointed by the Responsible Entity and/or Authorised Participants exit the business or are unable to or choose not to proceed with buy and/or sell orders with respect to the Fund and no other market participant creates buy and/or sell orders, units may trade at a discount to the NAV and possibly face trading halts and/or cease to be quoted for trading on the ASX.

Material Portfolio Information (MPI) risk

There is a risk that trading prices determined using the MPI disclosure model during the Business Day will not accurately represent the value of the units. This risk could arise due to, for example, market volatility or stale prices in the underlying assets. Investors must rely on the expertise of the Responsible Entity, the Investment Manager and the Market Maker(s) to determine a proxy basket and bid/ask prices that will accurately track all material price movements of the portfolio.

Operational risk

The risk of loss resulting from inadequate or failed internal processes, people and systems, or from external events. Adverse impacts may arise internally through human error, technology or infrastructure changes, or through external events such as third party failures or crisis events.

Prime Broker risk

The Prime Broker is engaged to provide financing for the Fund's gearing. As security for the performance of its obligations under the PBA, the Responsible Entity has granted a charge to the Prime Broker over a subset of the Fund's assets. This means that the Prime Broker is entitled to take possession of and sell the assets of the Fund if an event of default occurs under the financing arrangements. While the assets of the Fund are held as security, the Prime Broker may use these for its own purposes (including lending those assets to third parties) for the period that the Fund retains the relevant liability. Therefore, there is a risk that if the Prime Broker becomes insolvent whilst the Fund remains indebted to the Prime Broker, the assets of the Fund may not be returned to the Fund in full.

Regulatory and tax risk

Governments or regulators may pass laws, make changes to taxation laws, create policy or implement an existing policy that may affect the Fund as a whole or individual securities or the Investment Manager's ability to execute strategies. This may affect either a

Risk of the Fund

particular transaction or market, and may be either country specific or global. Such changes may result in the Fund failing to achieve its investment objectives.

Removal from quotation or termination risk

The AQUA Rules impose certain requirements for the continued quotation of securities, such as the units, on the ASX. Investors cannot be assured that the Fund will continue to meet the requirements necessary to maintain quotation on the ASX. In addition, the ASX may change the quotation requirements.

Securities and investment-specific risk

Within each asset class and the Fund, individual securities can be affected by risks that are specific to that investment or that security. For example, the value of a company's shares can be influenced by changes in company management, its business environment or profitability.

Securities lending risk

The Fund's assets may be lent by the Prime Broker in exchange for a more economical cash lending rate charged by the Prime Broker to the Responsible Entity on behalf of the Fund. There is the risk that a borrower may fail to return the securities to the Prime Broker in a timely manner or at all. Collateralisation may not always protect investors from losses. In such events, a Fund could experience delays in recovering assets and may incur a capital loss. This may negatively impact the value of your investment.

8. Fees and other costs

DID YOU KNOW?

Small differences in both investment performance and fees and costs can have a substantial impact on your long-term returns. For example, total annual fees and costs of 2% of your account balance rather than 1% could reduce your final return by up to 20% over a 30-year period (for example, reduce it from \$100,000 to \$80,000). You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs. You may be able to negotiate to pay lower fees. Ask the fund or your financial adviser.

TO FIND OUT MORE

If you would like to find out more, or see the impact of the fees based on your own circumstances, the **Australian Securities and Investments Commission (ASIC)** Moneysmart website (www.moneysmart.gov.au) has a managed funds fee calculator to help you check out different fee options.

This section shows fees and other costs that you may be charged. These fees and costs may be deducted from your money, from the returns on your investment or from the assets of the managed investment scheme as a whole. Taxes are set out in another part of this document. You should read all the information about fees and costs because it is important to understand their impact on your investment. Unless otherwise stated, all fees and costs are quoted inclusive of goods and services tax (GST) and net of any input tax credits (ITCs) or reduced input tax credits (RITCs) as applicable.

Warning: Additional fees may be charged if you're investing in the Fund via a Service or if you consult a financial adviser. Please refer to your Service Operator's disclosure document or statement of advice from your financial adviser in which details of the fees are set out.

Fees and costs summary

First Sentier Geared Australian Share Fund Complex ETF		
Type of fee or cost	Amount	How and when paid
Ongoing annual fees and costs*1		
Management fees and costs The fees and costs for managing your investment	0.95% p.a. of the TAV ² of the Fund, comprised of: 1. Management fee: 0.95% p.a. ³ of the TAV of the Fund; 2. Recoverable expenses: 0.00% p.a. ⁴ of the TAV of the Fund; and 3. Indirect costs: 0.00% p.a. of the TAV of the Fund. Total management fees and costs are estimated to be 2.38% p.a. of the NAV of the Fund. ²	1. The management fee is deducted from the assets of the Fund and is calculated and accrued daily, reflected in the unit price and payable monthly in arrears. 2. Recoverable expenses incurred in managing the Fund will generally be paid out of the management fee. If the expenses are recovered, they will be deducted from the Fund's assets when incurred. 3. Any indirect costs are deducted from the value of the assets of the Fund as and when incurred and are reflected in the ongoing unit price.
Performance fees Amounts deducted from your investment in relation to the performance of the Fund	NIL	Not applicable
Transaction costs The costs incurred by the scheme when buying or selling assets	Estimated to be 0.00% p.a. ⁵ of the NAV of the Fund	The transaction costs are deducted from the assets of the Fund as and when incurred. They are disclosed net of the amounts recovered by the buy/sell spread.
Member activity related fees and costs (fees for services or when your money moves in or out of the scheme)		
Establishment fee The fee to open your investment	NIL	Not applicable
Contribution fee The fee on each amount contributed to your investment	NIL	Not applicable
Buy-sell spread	+0.25%/-0.25% ⁶	The buy/sell spread may be applied when applying and withdrawing from

First Sentier Geared Australian Share Fund Complex ETF

Type of fee or cost	Amount	How and when paid
Ongoing annual fees and costs*¹		
An amount deducted from your investment representing costs incurred in transactions by the scheme		the Fund and is reflected in the Fund's entry and exit unit price.
Withdrawal fee The fee on each amount you take out of your investment	NIL	Not applicable
Exit fee The fee to close your investment	NIL	Not applicable
Switching fee The fee for changing investment options	NIL	Not applicable

*Certain additional costs may apply. See 'Additional explanation of fees and costs' for more information.

1. Unless otherwise stated, all fees, costs and expenses in this section are based on information available at the Issue Date. As the Fund was not offered from at least 11 months before 30 June 2024, costs and expenses reflect the Responsible Entity's reasonable estimates as at the Issue Date of those costs and expenses that will apply for the financial year ended 30 June 2025 (adjusted to reflect a 12-month period).

2. The TAV of the Fund is the NAV of the Fund (being the assets less liabilities) plus the value of assets acquired with the borrowing, adjusted for any dividends to be received by the Fund and the value of unsettled trades. The management fee shown is based on the Fund's management fee of 0.95% p.a. charged on its TAV, which equates to a management fee of 2.38% p.a. of the Fund's NAV based on a maximum Gearing Ratio of 60%. However, this representative NAV figure may be more or less depending on the actual Gearing Ratio. Please refer to 'Additional explanation of fees and costs' below.

3. The Responsible Entity may negotiate rebates or waive all or part of its fees for certain wholesale clients in accordance with the Corporations Act. Please refer to 'Negotiable fees' in the 'Additional explanation of fees and costs' below.

4. The Responsible Entity may decide to pay abnormal expenses incurred in managing the Fund out of the assets of the Fund, in addition to payment of the management fees. Please refer to 'Recoverable expenses' in the 'Additional explanation of fees and costs' below.

5. As the Fund was not offered from at least 11 months before 30 June 2024, the transaction costs represent the Responsible Entity's reasonable estimate as at the Issue Date of transaction costs that will apply for the financial year ended 30 June 2025 (adjusted to reflect a 12-month period).

6. The buy/sell spread is current as at the Issue Date and is applied to applications and withdrawals directly with the Responsible Entity. Investors buying or selling units on the ASX may instead be subject to a bid/ask spread. Please refer to 'Buy/sell spread' and 'Bid/ask spread' in the 'Additional explanation of fees and costs' below.

Example of annual fees and costs for the Fund

This table gives an example of how the ongoing annual fees and costs in the Fund can affect your investment over a 1-year period. You should use this table to compare this Fund with other products offered by managed investment schemes.

EXAMPLE - First Sentier Geared Australian Share Fund Complex ETF Balance of \$50,000 with a contribution of \$5,000 during the year*¹		
Contribution fees	NIL	For every additional \$5,000 you put in, you will be charged \$0
PLUS Management fees and costs	0.95% p.a. of the TAV ² of the Fund. Estimated to be 2.38% p.a. of the NAV of the Fund ²	And , for every \$50,000 you have in the Fund, you will be charged or have deducted from your investment \$1,190.00 each year
PLUS Performance fees	NIL	And , you will be charged or have deducted from your investment \$0 in performance fees each year
PLUS Transaction costs	0.00% p.a. of the NAV of the Fund	And , you will be charged or have deducted from your investment \$0 in transaction costs
EQUALS Cost of First Sentier Geared Australian Share Fund Complex ETF	If you had an investment of \$50,000 at the beginning of the year and you put in an additional \$5,000 during that year, you would be charged fees and costs of \$1,190.00 . What it costs you will depend on the investment option you choose and the fees you negotiate. ³	

*Additional fees may apply if you're investing in the Fund via a Service or if you consult a financial adviser. Please refer to 'Additional explanation of fees and costs' below for more information on the maximum management fees the Responsible Entity may charge.

1. The example above is illustrative only and assumes the additional \$5,000 is invested at the end of the year and the value of the investment is constant over the year. Therefore, the management fees and costs are calculated using the \$50,000 balance only. Additional fees may be charged if you're investing in the Fund via a Service or if you consult a financial adviser. The buy spread charged on the additional \$5,000 is not included in the example above. Where permitted under the terms of an Authorised Participant agreement, we may apply a higher minimum initial application amount and minimum additional application amount for an Authorised Participant.

2. The TAV of the Fund is the NAV of the Fund (being the assets less liabilities) plus the value of assets acquired with the borrowing, adjusted for any dividends to be received by the Fund and the value of unsettled trades. The management fee shown is based on the Fund's management fee of 0.95% p.a. charged on its TAV, which equates to a management fee of 2.38% p.a. of the Fund's NAV based on a maximum Gearing Ratio of 60%. However, this representative NAV figure may be more or less depending on the actual Gearing Ratio. Please refer to 'Additional explanation of fees and costs' below.

3. The Responsible Entity may negotiate rebates or waive all or part of its fees for certain wholesale clients in accordance with the Corporations Act. Please refer to 'Negotiable fees' in the 'Additional explanation of fees and costs' below.

Additional explanation of fees and costs

This section provides additional information about the fees and costs that you may be charged. The fees and costs may be deducted from your money, from the returns on your investment or from the assets of the Fund as a whole.

You should read all the information about fees and costs because it is important to understand their impact on your investment.

Ongoing annual fees and costs

The ongoing annual fees and costs for the Fund comprises:

- management fees and costs (including estimated recoverable expenses and estimated indirect costs); and
- transaction costs.

The amounts shown in the 'Fees and costs summary' are current as at the Issue Date of this PDS.

Management fees and costs

Management fees and costs are comprised of a management fee, any recoverable expenses and indirect costs that you incur by investing in the Fund but excludes transaction costs and government charges.

Management fee

The Responsible Entity receives a fee for management of the assets in the Fund and overseeing the day-to-day administration and operations of the Fund. Any fees charged by the Investment Manager, Registry, ETF Registry, iNAV Provider, Administrator and Market Maker(s) will be paid by the Responsible Entity out of its management fee and will not be an extra cost to you or the Fund. The management fee is paid to the Responsible Entity monthly in accordance with the Constitution.

The Fund borrows to acquire additional assets with financing provided by the Prime Broker. The management fees and costs are applied against the TAV of the Fund. The TAV of the Fund is the NAV of the Fund (being the assets less liabilities) plus the value of assets acquired with the borrowing, adjusted for any dividends to be received by the Fund and the value of unsettled trades. The management fees and costs are also disclosed in the 'Fees and costs summary' as a percentage of the Fund's NAV, which will vary in line with changes in the level of borrowing.

Recoverable expenses

The Responsible Entity is entitled to be paid or reimbursed from the assets of the Fund for any expenses that it incurs in relation to the proper performance of its duties relating to the administration or management of the Fund and excludes transaction costs.

Recoverable expenses may include abnormal operating expenses and normal operating expenses.

As at the Issue Date of this PDS, the Responsible Entity pays any recoverable expenses out of the management fee. However, if we decide to deduct expenses in addition to the management fee in the future, we will give you 30 days' prior written notice.

Abnormal operating expenses

Abnormal costs are due to abnormal events such as unitholder meetings, changes to the Constitution or defending or pursuing legal proceedings. Where such events do occur, the Responsible Entity may at its discretion determine to recover these expenses from the Fund. If the expenses are recovered, they will be paid from the Fund's assets when the expenses are incurred.

Normal operating expenses

Normal operating expenses are those costs that are incurred in the day-to-day administration of the Fund and include (but are not limited to), fees and expenses in connection with the marketing, administration and management of the Fund and its assets, costs of preparing and distributing reports and distribution statements to unitholders, ASIC and ASX fees and costs incurred in connection with the Fund, and other costs associated with service providers providing administration (including iNAV), custody and market making services. The Constitution does not place any limit on the amount of expenses incurred in relation to the proper performance of the Responsible Entity's duties. As at the Issue Date of this PDS, normal operating expenses incurred in managing the Fund will be paid by the Responsible Entity out of the management fee of the Fund.

Indirect costs

Indirect costs include any amount not charged as a fee that the Responsible Entity knows, or may reasonably estimate, has reduced or will reduce (directly or indirectly) the income of or property of the Fund, or the amount or value of the income of, or property attributable to the Fund, or an underlying fund in which the Fund invests. They do not include transaction costs.

Transaction costs

Transaction costs are generally incurred when the assets in the Fund are charged or the Fund experiences cash flow into or out of the Fund and are not included in the management fees and costs. The transaction costs shown in the 'Fees and costs summary' are net of any amount recovered by the buy/sell spread that is charged by the Responsible Entity.

They include costs such as brokerage, exchange fees, clearing costs and applicable stamp duty and other government taxes. Transaction costs are paid out of the assets of the Fund as and when incurred and are an additional cost to unitholders to the extent not recovered through the buy/sell spread.

Transaction costs for the Fund may vary every year and will be impacted by the volume of trading, brokerage arrangements and other factors.

The estimated total transaction costs and the estimated net transaction costs for the current financial year for the Fund will be:

Estimated total transaction costs p.a. of the NAV of the Fund ¹	Estimated recovery amount p.a. of the NAV of the Fund ¹	Estimated net transaction costs p.a. of the NAV of the Fund ¹
0.36%	0.39%	0.00%

1. As the Fund was not offered from at least 11 months before 30 June 2024, the transaction costs above represent the Responsible Entity's reasonable estimate as at the Issue Date of transaction costs for the 12-month period of the current financial year as at the Issue Date of the PDS.

Buy/sell spread

A buy/sell spread will generally be applied to applications and withdrawals and reflected in the Fund's application and withdrawal unit price. This aims to ensure that other unitholders aren't impacted by the transaction costs associated with a particular unitholder buying or selling units in the Fund.

The Responsible Entity has the discretion to waive the buy/sell spread on applications or withdrawals where no transaction costs are incurred.

The buy/sell spread will impact the return on your investment and is an additional cost to you. However, as it is built into the Fund's unit price, it won't be recorded separately on investor statements. There is no buy/sell spread applied to the reinvestment of distributions. The buy/sell spread is not paid to the Responsible Entity as it is retained in the Fund to offset the actual expenses incurred in the buying or selling of assets. The Responsible Entity may vary the buy/sell spread from time to time and prior notice will not normally be provided to you.

Estimated transaction costs, which are used to determine the buy/sell spreads, are reviewed regularly. The buy/sell spreads are current as at the Issue Date of this PDS, however they may increase or decrease during the life of this PDS. Any updates from time to time will be available on the First Sentier Investors' website at www.firstsentierinvestors.com.au.

Bid/ask spread

For an investor that buys or sells units on the ASX, the price at which they transact may vary from the prevailing NAV per unit. The prices on the ASX are determined in the secondary market by market participants who set their own prices at which they wish to buy or sell units in the Fund. The cost of the bid/ask spread on the ASX may be different to the cost of the buy/sell spread for investors who apply or withdraw directly with the Responsible Entity.

Borrowing costs

The Fund will incur borrowing costs (such as interest payable on loans from the Prime Broker) when borrowing from the Prime Broker to provide financing for gearing, which are additional to the management fees and costs and transaction costs shown in the 'Fees and costs summary' in this PDS. These borrowing costs are paid to the Prime Broker out of the assets of the Fund and are built into the Fund's NAV per unit.

Market Maker fees

The Responsible Entity has appointed a Market Maker(s) to provide market making activities by placing buy and sell orders for units on the ASX and also to provide liquidity to investors on the ASX by acting as a buyer and seller of units on the ASX. The Market Maker(s) charges a fee as a result of these activities. This fee will be paid by the Responsible Entity out of the management fee of the Fund.

Market Makers and Authorised Participants will generally retain for their own account any trading profit or bear any loss generated by the market making and trading activities (as applicable).

Broker fees

Investors will likely incur customary brokerage fees or commissions when buying and selling units on the ASX. Investors should consult their broker for more information in relation to their fees and charges.

Negotiable fees

The law allows us to negotiate, rebate or waive all or part of the management fees with 'wholesale clients' (as defined by the Corporations Act). We generally do not negotiate fees. However, the Responsible Entity may negotiate investment management and/or performance fees (if applicable) with wholesale clients on a case-by-case basis. The Responsible Entity does not negotiate fees with retail investors or individual platform investors. Please contact Investor Services on 1300 553 490 for more information.

Maximum fees and charges

The maximum fees for the Fund under the Constitution are set out in the table below.

Maximum Management Fee (% p.a.) of Gross Asset Value (GAV) of the Fund ¹

3.00%

1. Exclusive of GST.

Increases or alterations to fees and costs

The Responsible Entity has the right to increase its management fees as shown in the 'Fees and other costs' section of this PDS, up to the maximum management fee limit set out in the Constitution of the Fund as referred to above, without obtaining the consent of unitholders where the Responsible Entity has given unitholders or their Service Operator (if applicable) at least 30 days' prior written notice.

Distribution fees

Subject to law, the Responsible Entity or Investment Manager may make non-volume based product access payments to Service Operators who distribute the Fund on their investment menu. Where allowable by law, the Investment Manager may also make payments to Service Operators and dealer groups for their marketing support. If these payments are made, they are made by the Investment Manager out of its own resources and they are not an additional cost to you or the Fund.

Benefits received

A component of the bundled brokerage paid by relevant funds managed by the Investment Manager is passed on to a third party provider and held in a commission sharing account that is used to pay for investment research. The Investment Manager may use this for any investment purpose, including for relevant funds managed by the Investment Manager.

Taxation

Investing in the Fund is likely to have tax consequences and you are strongly advised to seek your own independent professional tax advice tailored to your personal circumstances concerning the making, holding or disposing of an investment in the Fund and any withdrawal from the Fund.

Please refer to section 10 'Taxation' for more information in relation to tax.

9. About the AQUA Rules and the differences to the ASX Listing Rules

As at the Issue Date, an application has been made to the ASX for units in the Fund to be quoted for trading on the ASX under the AQUA Rules. If the application is approved by the ASX, units in the Fund will be able to be traded on the ASX under the AQUA Rules.

The Fund will not be listed under the ASX Listing Rules. The AQUA Rules form part of the ASX Operating Rules, which are accessible at www.asx.com.au.

The AQUA Rules provide a tailored framework for the quotation of exchange-traded funds on the ASX. In operational terms, the market for exchange-traded funds quoted under the AQUA Rules operates in the same way it does for listed equities, with continuous matching of bids and offers and an opening and closing auction.

The following table sets out the key regulatory differences between the ASX Listing Rules and the AQUA Rules.

Requirement	ASX Listing Rules	AQUA Rules
Continuous disclosure	Issuers are subject to continuous disclosure requirements under ASX Listing Rule 3.1 and section 674 of the Corporations Act.	<p>Issuers of products quoted under the AQUA Rules are not subject to the continuous disclosure requirements in ASX Listing Rule 3.1 and section 674 of the Corporations Act. The Responsible Entity will comply with the disclosure requirements in section 675 of the Corporations Act. This means that the Responsible Entity will disclose to ASIC information which is not generally available and that a reasonable person would expect, if the information were generally available, to have a material effect on the price or value of the units, provided that such information has not already been included in this PDS (as supplemented or amended).</p> <p>Such information will be published on the ASX announcements platform and the First Sentier Investors' website at www.firstsentierinvestors.com.au at the same time as it is disclosed to ASIC (if required).</p> <p>Under the AQUA Rules 10A.4.1, the Responsible Entity must disclose:</p> <ul style="list-style-type: none"> – information about the NAV of the Fund daily; – information about distributions paid in relation to the Fund as soon as possible after being declared or paid (whichever is earlier) and any distribution statements or distribution information made available or provided to investors; – information about the number of units in the Fund on issue at the end of each month (within five Business Days of the end of the month); – information about the number of units issued and total value of issued units during the month (within five Business Days of the end of each month); – information about the number of units redeemed and total value of redemptions from the Fund during the month (within five Business Days of the end of each month); – the difference between the number of units issued and redeemed during the month and the difference between the value of units issued and redeemed during the month; – any other information which is required to be disclosed to ASIC under section 675 of the Corporations Act; – any other information that would be required to be disclosed to the ASX under section 323DA of the Corporations Act if the units were admitted under the ASX Listing Rules; and – any other information that is required to be disclosed or made available to investors generally, or prospective investors, in the Fund under the Corporations Act or otherwise. <p>In addition, under the AQUA Rules, the Responsible Entity must immediately notify the ASX of any information the non-disclosure of which may lead to the establishment of a false market in the Fund or which would be likely to materially affect the price of the units.</p>
Periodic disclosure	Issuers are required to disclose half-yearly and annual financial information and reports to the ASX announcements platform.	Issuers of products quoted under the AQUA Rules are not required to disclose half-yearly or annual financial information or reports relating to itself to the ASX announcement platform. However, the Responsible Entity will disclose financial information and reports in respect of the Fund to the ASX announcements platform at the same time such financial information and reports are lodged with ASIC under Chapter 2M of the Corporations Act.
Corporate governance	Listed companies and listed managed investment schemes are subject to notification requirements under the Corporations Act and the ASX Listing Rules relating to takeover bids, buy-backs, change of capital, new issues, restricted securities, disclosure of directors' interests and substantial shareholdings.	<p>Although the units are quoted under the AQUA Rules, the Fund itself is not listed and therefore not subject to certain corporate governance requirements that apply to listed managed investment scheme. While Perpetual Limited (which is the parent company of the Responsible Entity) is listed on the ASX, the Responsible Entity is not and is similarly not subject to those requirements.</p> <p>The Responsible Entity will be required to comply with the related party requirements in Part 5C.7 and Chapter 2E of the Corporations Act and section 601FM of the Corporations Act including that the Responsible Entity may be removed by an extraordinary resolution of members, on which the Responsible Entity would not be entitled to vote.</p>
Related party transactions	Chapter 10 of the ASX Listing Rules relates to transactions between an entity and a person in a position to influence the entity and sets out controls over related party transactions.	<p>Chapter 10 of the ASX Listing Rules does not apply to products quoted under the AQUA Rules.</p> <p>The Responsible Entity will still be required to comply with the related party requirements in Part 5C.7 and Chapter 2E of the Corporations Act.</p>

Requirement	ASX Listing Rules	AQUA Rules
Auditor rotation obligations	Division 5 of Part 2M.4 of the Corporations Act imposes specific rotation obligations on auditors of listed companies and listed managed investment schemes.	Issuers of products quoted under the AQUA Rules are not subject to the auditor rotation requirements in Division 5 of Part 2M.4 of the Corporations Act. An auditor is appointed by the Responsible Entity to audit the financial statements and compliance plan of the Fund.
Spread requirements	There are requirements under the ASX Listing Rules that issuers satisfy certain minimum spread requirements (i.e. a minimum number of holders each having a minimum parcel size).	These requirements do not apply to products under the AQUA Rules. Under the AQUA Rules, unless the ASX determines otherwise, an issuer must ensure a reasonable bid and volume is maintained for the product on the ASX except in permitted circumstances, or have in place other arrangements which meets ASX requirements for providing liquidity, generally through the appointment of a market maker.

About CHESS

The Responsible Entity participates in the Clearing House Electronic Sub-Register System (**CHESS**). CHESS is a fast and economical clearing and settlement facility which also provides an electronic sub-register service. The Registry has established and will maintain an electronic sub-register with CHESS on behalf of the Responsible Entity.

When you purchase units on the ASX, you will receive a holding statement which will set out the number of units you hold. The holding statement will specify the HIN allocated by CHESS.

10. Taxation

The purpose of this summary is to explain, in general terms, some of the Australian tax consequences of investing in the Fund. It does not provide a comprehensive guide to the tax consequences associated with making, holding or disposing of an investment in the Fund, and does not consider the specific circumstances of a unitholder that may invest in the Fund. This section should not be used as the basis upon which a potential investor decides whether or not to invest in the Fund.

The taxation implications of investing in the Fund are particular to a unitholder's circumstances. A prospective investor should seek professional taxation advice before investing, or dealing with their investment, in the Fund. Nothing contained in this PDS should be construed as the giving of, or be relied upon, as tax advice.

Unless otherwise specified, this summary assumes the unitholder holds units in the Fund directly and on 'capital' account. It also assumes the unitholder is a resident of Australia for tax purposes (**Australian Unitholders**). It does not deal with particular types of unitholders, including those who hold their units as trading stock or otherwise as part of a trade or profit making undertaking or scheme (i.e. on revenue account), those whose units are held subject to the Australian taxation of financial arrangements regime, those who hold their units through a Service or (unless otherwise specified) those who are non-Australian Unitholders.

Goods and Services Tax

No GST should be payable in relation to the acquisition, disposal, withdrawal or transfer of units in the Fund, nor any distributions made in respect of the units held by a unitholder in the Fund.

However, GST will likely apply to fees and any reimbursement of costs charged to the Fund. Where the Fund is registered for GST, it should be entitled to claim ITCs or RITCs (being 55% or 75% of the GST paid) depending on the type of fee or cost.

Unless otherwise stated, all fees and costs are quoted inclusive of GST and net of any ITCs or RITCs as applicable.

Attribution Managed Investment Trusts

The AMIT regime, in broad terms, applies to a MIT whose unitholders have clearly defined interests in relation to the income and capital of the trust and the trustee or responsible entity of the MIT has made an irrevocable election to apply the regime.

The Responsible Entity intends to or has already made the election for the Fund to operate as an AMIT.

The AMIT rules contain several provisions that will impact on the taxation treatment of the Fund. The key features include:

- an attribution model for determining member tax liabilities, which also allows amounts to retain their tax character as they flow through a MIT to its unitholders. Australian Unitholders, would therefore be taxed on the tax components of the Fund that are attributed to them on a 'fair and reasonable' basis each year. Non-Australian Unitholders may have tax withheld from distributions by the Responsible Entity of the Fund. The rate of withholding will depend on the type of income distributed or attributed and the country of residence of a unitholder;
- the ability to carry forward certain understatements and overstatements of taxable income and adjust them in later income years, instead of re-issuing investor statements;
- deemed fixed trust treatment under the income tax law;
- certain downwards and upwards cost base adjustments to units;
- a choice is available to treat individual classes of units (as relevant) as separate AMITs; and
- legislative certainty about the treatment of tax deferred distributions.

Taxation of the Fund

We intend to manage the Fund so that the Responsible Entity of the Fund is not itself subject to Australian income tax (and instead that unitholders will be subject to any Australian income tax consequences based on their share of the Australian taxable income and any tax offsets of the Fund).

In particular, the Responsible Entity of the Fund intends that:

- when the Fund is an AMIT: all taxable income and tax offsets of the Fund will be 'attributed' to unitholders on a 'fair and reasonable' basis in each financial year and will be reflected in the AMMA Statement provided to unitholders;
- when the Fund is not AMIT: unitholders will continue to be presently entitled to all the income of the Fund in each financial year and a unitholder's share of the net taxable income of the Fund will be reflected in the tax statement provided to the unitholders.

Whilst the Fund is a MIT (including an AMIT), this is subject to the application of the MIT non-arm's length income rules discussed in the 'Investments held by the Fund' section.

Investments held by the Fund

Where the Fund is a MIT, a MIT may make an irrevocable election for the disposal or realisation of certain 'covered' assets (including shares, units and rights and options in respect of shares or units) to be dealt with solely under the Australian capital gains tax (CGT) regime. The Responsible Entity intends to or has already made such election in respect of the Fund, which will apply for each income year unless the Fund ceases to satisfy the eligibility criteria to be a MIT for that income year. For any income year where the eligibility criteria are not satisfied, the Australian taxation treatment of the disposal or realisation of covered assets will be determined under ordinary principles. The election also does not apply for the disposal or realisation of any other assets (including interests in debt or arrangements subject to the Taxation of Financial Arrangement rules).

In addition, where the Fund is a MIT, the Australian Commissioner of Taxation may determine that non-arm's length income received is subject to special rules. Whilst these rules are not expected to apply, if they do the Responsible Entity may be subject to income tax on such income at the corporate tax rate (currently 30%).

Where the Fund disposes or realises an asset that it has held for a continuous period of at least 12 months, any capital gain under the CGT regime may be reduced by the 50% CGT discount in calculating the taxable income of the Fund. This does not apply to revenue gains.

Where the Fund makes a revenue or net capital loss, it cannot distribute or attribute these losses to unitholders. However, the Fund may be able to carry forward and offset the capital losses against capital gains of the Fund in subsequent years. Subject to satisfying certain conditions, the Fund may also be able to offset revenue losses against taxable income (including net capital gains) in subsequent years.

Tax implications of Australian Unitholders

This section contains a general outline of certain Australian income tax implications of holding units in the Fund for Australian Unitholders (referred to in this section as 'you' or 'your').

Distributions and your share of the Fund's taxable income

Your share of the taxable income and any tax offsets of the Fund for an income year should be included in your tax return for that income year, irrespective of the amount and timing of distributions actually received or whether they are reinvested.

The taxable income of the Fund may contain various components which generally preserve the same character for Australian tax purposes in your hands as when they were derived by the Fund. These may include dividends, interest, and capital gains. You may also be allocated certain amounts not represented by a cash distribution such as Australian dividend franking credits.

If you are entitled to a share of franking credits from a Fund, they will generally be included in calculating your taxable income. The franking credits may then also be used to offset any tax payable on income for that year. Excess franking credits may also be refundable to individuals and superannuation funds, and in certain circumstances generate tax losses for corporate investors. Your entitlement to franking credits is subject to legislative restrictions, and in particular the satisfaction of the 'qualified person' or 'holding period' rules (which includes the 'related payment' rules). You may be denied the benefit of your share of any franking credits where you and/or the Fund have not held an interest in the relevant underlying securities on which the dividends are paid 'at risk' for a continuous period of 45 days for ordinary shares (ignoring the day of acquisition and disposal) over the prescribed period.

You will also be required to include your share of any capital gains of the Fund (for example, on the disposal of shares) in calculating your taxable income. If those capital gains include 'discount' capital gains, in calculating the capital gain included in your taxable income, you will be required to 'gross up' the amount of the capital gain that you include in calculating your taxable income to reverse any CGT discount claimed by the Fund. You can then apply any eligible capital losses you have to reduce that capital gain, and you may in certain circumstances be eligible to apply a CGT discount to reduce any remaining capital gain (currently 50% for individuals and superannuation funds; 33 ⅓% for complying superannuation funds). No CGT discount is available for companies.

To the extent the cash or property distributions you are actually entitled to from the Fund (including that you reinvest) for an income year exceed the amounts you include in calculating your taxable income in respect of your investment in the Fund for that income year, this may reduce the cost base of your units in the Fund for taxation purposes. Where the cost base of your units has been reduced to nil, any excess amounts may trigger a capital gain for you that is required to be included in your taxable income. Whilst the Fund is an AMIT, your cost base may also be increased where the distributions you receive from the Fund (including that you reinvest) are less than the taxable income of the Fund attributed to you (subject to certain adjustments). You should seek your own independent professional advice in relation to your individual circumstances.

Disposal of units in the Fund

The transfer or withdrawal (i.e. redemption) of a unit in the Fund (including disposal through trading on the ASX) will be a CGT event for Australian tax purposes, which may result in you recognising a capital gain or capital loss.

You will make a capital gain if the proceeds you receive are more than the cost base of the units disposed of. You will make a capital loss if those proceeds are less than the reduced cost base of the units.

If you have held your units continuously for at least 12 months prior to their disposal, any capital gain may be eligible to be reduced by the applicable CGT discount. Individuals and trustees of trusts may be entitled to a CGT discount of 50% while complying superannuation funds may be entitled to a CGT discount of 33 ⅓%. Companies are not entitled to any CGT discount.

Withdrawal from the Fund

If you withdraw part or all of your investment in the Fund (and as a result some or all of your units in the Fund are withdrawn), part of the proceeds from the withdrawal may be treated as a share of Australian taxable income and tax offsets of the Fund (which may include or comprise any taxable income (such as capital or other gains) that arises as a result of your withdrawal from the Fund). In that case, you may be required to include your share of that taxable income of the Fund in preparing your tax return in the income year in which the withdrawal occurs.

Any capital gain that would otherwise arise on the withdrawal (as discussed above) may be reduced by the amount of the withdrawal amounts that are included in calculating your Australian taxable income.

Tax implications for non-Australian Unitholders

The following section deals with certain Australian income tax implications of holding units in the Fund for non-Australian Unitholders (referred to in this section as 'you' or 'your').

Non-Australian Unitholders should seek independent tax advice on the Australian and any foreign tax implications associated with making, holding, disposing or withdrawing (ie redeeming) an investment in a Fund.

Distributions and your share of the Fund's taxable income

You may have Australian income tax withheld or deducted from distributions you receive from the Fund. The withholding or deduction for Australian income tax will be calculated at the appropriate rate based on your share (or estimated share) of the relevant taxable income of the Fund for the income year. This will be the case even if you reinvest your distribution (in which case the amount available for reinvestment will be reduced) or the cash or property distribution actually received from the Fund is less than your share of the Australian-sourced taxable income of the Fund.

The amount that is required to be withheld or deducted will depend on a number of factors, including the character of the taxable income of the Fund and your jurisdiction of tax residence. Amounts attributable to Australian franked dividends received by the Fund will not be subject to Australian withholding tax. However, amounts attributable to unfranked dividends paid by Australian companies, interest (or amounts in the nature of interest) with an Australian source or (where the Fund is a MIT that is a withholding MIT) other taxable income of the Fund to the extent it is from an Australian source (including amounts attributable to capital gains of the Fund, but only to the extent they are in respect of 'taxable Australian Property' (discussed below)), may be subject to Australian withholding tax.

Any such withholding is generally a final tax, and you will not be required to lodge an Australian tax return in respect of your share of that taxable income subject to final Australian withholding tax.

Disposal of units in the Fund

The transfer or withdrawal (i.e. redemption) of a unit in the Fund (including disposal through trading on the ASX) will be a CGT event for Australian tax purposes, which may result in you recognising a capital gain or capital loss for Australian income tax purposes. However, such capital gain or loss will generally be disregarded unless the units are 'taxable Australian property'. Based on current law, the units will generally only be 'taxable Australian property' where both you (together with any of your associates) have a greater than 10% interest (on an associate-inclusive basis) for more than 12 months in the 24 months preceding the disposal, and more than 50% of the market value of a Fund's assets are attributable to interests in Australian real property.

Withdrawal from the Fund

If you withdraw part or all of your investment in the Fund (and as a result some or all of your units in the Fund are withdrawn), you may also be attributed a share of the Australian taxable income and tax offsets of the Fund (which may comprise or include any taxable income (such as capital or other gains) that arises as a result of your withdrawal from the Fund). In that case, Australian income tax may be required to be withheld or deducted from the proceeds of any withdrawal from the Fund.

Any taxable capital gain that arose on the withdrawal may be reduced by the amount of the proceeds that are subject to Australian withholding tax.

Tax File Numbers/Australian Business Numbers

The Responsible Entity is authorised to request and collect your Australian Tax File Number (**TFN**) by the *Taxation Administration Act 1953 (Cth)* for the purposes of complying with and reporting information pursuant to Australian taxation laws. Unitholders are not obliged to quote their TFN or (where eligible) their Australian Business Number (**ABN**), and it is not an offence not to do so. However, if a unitholder does not quote either of them (or provide proof of a relevant exemption), the Responsible Entity of the Fund has an obligation to withhold tax on distributions to you at the highest marginal tax rate, plus any additional levies (currently 47%).

Non-Australian Unitholders are generally exempt from providing a TFN or ABN.

Australian Tax Reform

This summary is based upon the relevant tax laws of Australia, and their published interpretation, as at the Issue Date. Reforms to the taxation of trusts are generally ongoing (and can have retrospective effect). Unitholders should seek their own advice and monitor the progress of announcements and proposed legislative changes on the potential impact.

US Tax Withholding and Reporting under the Foreign Account Tax Compliance Act (FATCA)

The United States of America has introduced rules (known as **FATCA**) which are intended to prevent US persons from avoiding tax. Broadly, the rules, together with Australian implementing rules, require 'Financial Institutions' such as the Fund to report information regarding certain accounts (which may include your units in the Fund) to the Australian Taxation Office (**ATO**), which may then pass the information on to the US Internal Revenue Service.

To comply with these obligations, the Responsible Entity will collect certain information about you and undertake certain due diligence procedures to verify your FATCA status and, if required, provide information to the ATO in respect of your investment in the Fund.

If you do not provide this information the Registry will not be able to process your application. Unitholders may be required to provide certain information on request. FATCA also imposes a withholding tax in certain circumstances.

Common Reporting Standards

The Australian Government has implemented the OECD Common Reporting Standard for the Automatic Exchange of Financial Account Information (**CRS**). CRS, like the FATCA regime, requires Financial Institutions to report information regarding certain accounts to the ATO and follow related due diligence procedures.

The Fund is a 'Financial Institution' under the CRS and the Fund intends to comply with its CRS obligations by obtaining and reporting information on relevant accounts (which may include your units in the Fund) to the ATO. For the Fund to comply with its obligations, the Registry will request that you provide certain information and certifications. Unitholders may be required to provide certain information on request. The Registry will determine whether the Fund is required to report your details to the ATO based on their assessment of the relevant information received.

The ATO may provide this information to other jurisdictions that have signed a relevant "CRS Competent Authority Agreement", that provides the mechanism to facilitate the automatic exchange of information in accordance with the CRS. The Australian Government has enacted legislation amending, among other things, the *Taxation Administration Act 1953 (Cth)* of Australia to give effect to the CRS.

11. Other information

Labour standards, environmental, social and ethical considerations

The Responsible Entity does not itself take into account labour standards or environmental, social and ethical considerations for the purposes of selecting, retaining or realising investments for the Fund. The Responsible Entity has delegated investment management decisions of the Fund, to the Investment Manager pursuant to the IMA, which includes taking into account labour standards or environmental, social and ethical considerations for the purpose of selecting, retaining or realising investments.

For information in relation to how the Investment Manager incorporates ESG considerations into the management of this Fund, please refer to 'The Fund's approach to ESG' section.

The Fund's approach to ESG

Overview of the process

The Fund does not have ESG targets and on that basis is not designed for investors who are looking for funds that meet particular ESG targets.

This investment decision process, including with respect to ESG factors, may differ to other funds managed by the Investment Manager.

With respect to this Fund and its entity selection:

- the Investment Manager's research analysts seek to identify key industry and entity-specific profitability drivers and incorporate these into the analysis, modelling and valuation of an entity which the Fund is considering for investment;
- a proprietary ESG scoring system is also utilised by the Investment Manager and each entity is given a maximum ESG score out of 100 which is based on internally-derived research and external data of ESG factors. Under the ESG scoring system, each category of Environmental factors, Social factors and Governance factors are assessed equally for each entity (further details on the ESG factors are below);
- in deciding whether or not an entity should be included in the Fund's portfolio, the emphasis placed on a particular ESG factor is based on the Investment Manager's research analyst's assessment of whether that factor is likely to place an entity's business value at risk over the long-term. As a result, consideration of a particular ESG factor may vary by sector and/or region, as well as being influenced by entity-specific details; and
- the Investment Manager may or may not take into account the entity's ESG score when considering whether an entity may be eligible for inclusion in the Fund's portfolio. That is, there is no set weight to the ESG score as part of the overall investment decision process and as a result it's possible that an entity with low ESG-related scores may still be considered eligible for inclusion in the portfolio when considered against the other analysis, modelling and valuation of the entity.

ESG factors

In determining the ESG scores, the Investment Manager may consider ESG factors which could place an entity's business value at risk over the long-term, that include, but are not limited to, the following:

- **Environmental factors:** an entity's carbon emissions (such as its commitment to manage the carbon emissions of its business and the adoption of any carbon emission specific targets or practices) and its management of water and waste.
- **Social factors:** an entity's relationships with the indigenous communities recognised as the traditional owners of the land in which they operate; safety metrics (including fatalities) reflecting their safe-working practices and employee engagement and turnover.
- **Governance factors:** the presence or absence of certain governance structures within an entity (such as an independent Board, separate Chairman and CEO roles, independent audit and remuneration committees) and an entity's gender diversity.

Exclusion of certain investments

In addition to the above ESG analysis, the management of the Fund is also subject to the exclusion of investment (either in equity or debt (as applicable)) in entities that:

- derive any gross revenue directly from the manufacture of Controversial Weapons (defined below) or Tobacco Products (defined below); or
- own a 50% or more interest in entities that derive any gross revenue directly from the manufacture of Controversial Weapons or Tobacco Products.

This exclusion is subject to the following qualifications:

- For the purposes of this exclusion, Controversial Weapons means: anti-personnel mines, cluster weapons, biological and chemical weapons, depleted uranium, nuclear weapons produced in support of the nuclear weapons programs of non-nuclear weapon state parties and non-signatories to the Treaty on the Non-Proliferation of Nuclear Weapons and white phosphorus munitions.
- For the purposes of this exclusion, Tobacco Products means: traditional cigarettes and other tobacco products, such as cigars and chewing tobacco, however vaping and e-cigarette products are not captured by this definition.
- This exclusion does not apply to investments in entities with minority investments (i.e. less than 50% interest in the entity) in other entities or joint ventures that are involved in the manufacture of Controversial Weapons or Tobacco Products.
- The implementation of this exclusion is dependent on information relating to either reported revenues or revenue estimates provided by reputable third-party research providers. Where such information turns out to be inaccurate or there are delays in accessing such information, the implementation of this exclusion may in turn be delayed, particularly where there has been material changes in the nature of certain investments.

If any existing investment is subsequently assessed to be captured by the above exclusion, the relevant investment team will generally seek an orderly sale of that investment within three months, but this timeframe may vary on a case-by-case basis.

Constitution

The operation of the Fund is governed by the Constitution, which together with the *Corporations Act 2001 (Cth)* (**Corporations Act**), sets out the rights, liabilities and obligations of both unitholders and the Responsible Entity.

The Constitution also sets out the procedures for termination and winding up of the Fund. If the Fund is terminated, the net proceeds of the Fund will be distributed pro rata to unitholders according to their unit holdings, provided the Responsible Entity may retain such part of the proceeds it thinks fit to meet all outstanding liabilities and expenses.

The Constitution also contains provisions designed to limit the liability of unitholders to the amount they have invested in the Fund. However, you should be aware that the effectiveness of such a limitation is yet to be conclusively determined by the courts.

Subject to the Corporations Act, the Responsible Entity may alter a Constitution if it reasonably considers the amendments will not adversely affect unitholder's rights. Otherwise, the Responsible Entity must obtain approval by special resolution of the unitholders at a meeting of unitholders.

A copy of the Constitution may be obtained free of charge by contacting the Responsible Entity or the Investment Manager.

Compliance Plan

In accordance with the Corporations Act, a compliance plan has been prepared for the Fund and lodged with ASIC. The compliance plan outlines the measures the Responsible Entity will apply in operating the Fund to ensure that the Fund operates in compliance with the Constitution of the Fund and the Corporations Act.

An external auditor undertakes a review of the compliance plan and the Responsible Entity's compliance with it on an annual basis as required under the Corporations Act.

Investment Management Agreement (IMA)

The Responsible Entity is able to terminate the Investment Manager's appointment under the IMA in certain circumstances without penalty, including but not limited to:

- where the Investment Manager enters into receivership, liquidation, is placed under official management or an administrator is appointed to its affairs or it ceases to conduct business;
- where the Investment Manager, in a material respect, is in breach or fails to observe or perform any duty, obligation, representation, warranty or undertaking under the IMA and fails to rectify such breach or failure within a reasonable period specified by the Responsible Entity; and
- where the Responsible Entity has obtained independent external legal advice and considers it reasonably necessary to do so to ensure compliance with its duties and obligations under relevant law, the Constitution or by any court of competent jurisdiction.

Other service providers

Administrator

The Responsible Entity has appointed The Northern Trust Company ABN 62 126 279 918, AFSL 314970 as the administrator of the Fund (**Northern Trust** or **Administrator**). Northern Trust undertakes functions including portfolio valuation and investment accounting for the Fund.

Custodian and Prime Broker

The Responsible Entity has appointed Citigroup Global Markets Limited as the prime broker and custodian of the Fund (**Citigroup, Custodian** or **Prime Broker**). Citigroup will have no discretion relating to the investment of assets of the Fund and will not provide any investment advice in relation to the assets of the Fund.

Citigroup, as custodian, provides clearing and settlement services in relation to the Fund's securities and holds the Fund's assets. Citigroup appoints a local sub-custodian in Australia to hold custody of the Fund's assets.

The Responsible Entity (not the Custodian) is the operator of the Fund.

As well as custodial services, under the PBA:

- Citigroup provides cash lending services to implement the Fund's gearing strategy. Cash is lent from the Prime Broker to the Responsible Entity on behalf of the Fund at a predetermined rate which is reviewed on a regular basis; and
- Fund assets may be used by the Prime Broker under its own securities lending arrangements. There is no income received, or additional fees incurred, by the Responsible Entity, the Investment Manager or the Fund for the arrangement. This arrangement provides for a more economical cash lending rate charged by the Prime Broker to the Responsible Entity on behalf of the Fund. The Prime Broker is entitled to transfer to itself absolute ownership of a portion of the Fund's securities having a value up to, but not exceeding, 125% of the loan amount outstanding from time to time. While the assets of the Fund are held as security under the PBA, the Prime Broker may use these for its own purposes, which means, the Prime Broker is entitled to borrow, lend, charge or otherwise deal with the assets of the Fund on its own account, subject to an obligation to return equivalent assets. The Prime Broker receives cash, equities or such other financial instruments or securities as may be agreed collateral from the borrowers. There are risks associated with securities lending. Please refer to section 7 'Risks of investing in the Fund' for further information on securities lending risks.

Registry

The Responsible Entity has appointed MUFG Corporate Markets FS Pty Ltd ABN 44 114 914 215 (**MUFG Corporate Markets** or **Registry**) under a Registry Services Agreement (**RSA**) as the Issuer Sub-Register service provider for the Fund. In providing unlisted unit registry services, MUFG Corporate Markets will undertake functions including processing of investor instructions, maintaining the Issuer Sub-Register, arranging for the issue and withdrawal of units directly with the Responsible Entity and producing and distributing, regulatory and tax reporting to unitholders in the Fund.

ETF Registry

The Responsible Entity has appointed MUFG Corporate Markets (AU) Limited ABN 54 083 214 537 (**MUFG Corporate Markets (AU)** or **ETF Registry**) under a RSA as the CHESS Sub-Register service provider for the Fund. The RSA sets out the services provided by the ETF Registry on an ongoing basis together with the service standards. The role of the ETF Registry is to keep a record of unitholders that purchase units in the Fund on the ASX or Convert from the Issuer Sub-Register. This includes information such as the quantity of units held, TFNs (if provided), bank account details and details of DRP participation.

Market Maker(s)

The Responsible Entity has appointed the Market Maker(s) under a Market Making Agreement to execute market making activities. The role of a market maker is to provide liquidity for the Fund on the ASX. It does this by:

- placing orders to buy and sell units on the ASX (as required under the ASX Operating Rules); and
- via an Authorised Participant, creating and withdrawing units directly with the Responsible Entity pursuant to this PDS, which helps to ensure the number of units on issue available for trading matches supply and demand on the ASX.

The Responsible Entity seeks to appoint Market Maker(s) that:

- have experience in making markets in exchange traded funds in Australia;
- have the necessary skill and expertise to perform market making functions; and
- are market participants of the ASX (or trade through a market participant).

The Responsible Entity will use the MPI disclosure model under which a subset of securities in the Fund's portfolio will be disclosed to the market, with only characteristic information for the remaining securities in the portfolio being disclosed. The MPI disclosure model represents material portfolio information that will enable the Market Maker to determine the price at which it buys and sells units on the ASX.

A Market Maker uses information such as the iNAV and MPI to determine the price of the units in the Fund and places a bid/ask spread around this value before sending these prices to the ASX as bid and ask orders. Under the ASX Operating Rules, there is a maximum bid/ask spread for buy and sell orders that the Market Maker is required to place. These orders may be matched with orders of investors who are offering to sell or buy units, in which case the Market Maker and the relevant investors will trade on the ASX.

Authorised Participant(s)

The Responsible Entity has appointed the Authorised Participant(s) to assist with providing liquidity on the ASX pursuant to an Authorised Participant agreement. However, there is no obligation on an Authorised Participant to place buy and sell orders to support market making activities.

Where permitted under the terms of an Authorised Participant agreement, the Responsible Entity may apply a higher minimum initial and additional application amount and higher minimum account balance for an Authorised Participant(s).

iNAV Provider

The Responsible Entity has appointed the iNAV Provider to calculate the iNAV.

The Responsible Entity in its discretion may change the Administrator, Custodian, Prime Broker, Registry, ETF Registry, Market Maker(s), Authorised Participant(s) and iNAV Provider from time to time or appoint additional service providers.

Reporting and continuous disclosure

The following information will be available on the First Sentier Investors' website at www.firstsentierinvestors.com.au:

- the NAV per unit on a daily basis;
- the iNAV available throughout the Business Day;
- the MPI on a daily basis;
- the correlation between the performance of the MPI and the Fund on a quarterly basis;
- the full portfolio holdings of the Fund on a quarterly basis, with a delay of up to two months; and
- the PDS and TMD.

The Fund will, as applicable, be subject to certain reporting and ongoing disclosure obligations. Unitholders will receive (as applicable) copies of the following reports with respect to their unitholdings:

- transaction confirmation for their initial investment and all subsequent transactions;
- periodic transaction statements;
- attribution managed investment trust (**AMIT**) member annual statement (**AMMA Statement**);
- annual tax statement;
- AMIT distribution statement; and
- exit statement.

Unitholders investing via a Service will receive reporting from their Service Operator and unitholders investing by either applying for units directly with the Responsible Entity or purchasing units on the ASX can access reporting via the investor portal or request copies from the Registry, ETF Registry and/or Investment Manager.

The Fund will be subject to regular reporting and disclosure obligations as if it was an unlisted disclosing entity under the Corporations Act. The Responsible Entity will comply with its continuous disclosure obligations by publishing copies of the continuous disclosure notices on the First Sentier Investors' website at www.firstsentierinvestors.com.au in accordance with ASIC's good practice guidance on website disclosure.

In addition, you may obtain copies of the following information at no charge by contacting the Responsible Entity and copies of any documents lodged with ASIC in relation to the Fund may be obtained from, or inspected at, an ASIC office (as applicable):

- the annual financial reports most recently lodged with ASIC;
- any half-yearly financial reports lodged with ASIC after the lodgement of the aforementioned annual report;
- managed investment trust (**MIT**) fund payment notices and AMIT deemed payment and dividend, interest and royalty payment notices;
- any continuous disclosure notices given by the Fund; and
- any ongoing disclosure of material changes and significant events.

Unitholders investing via a Service will receive Fund information from their Service Operator and unitholders investing by either applying for units directly with the Responsible Entity or purchasing units on the ASX will receive Fund information from the Investment Manager.

ASIC Relief

Relevant interest – ASIC has granted relief under *ASIC Corporations (Relief to Facilitate Admission of Exchange Traded Funds) Instrument 2024/147* under Section 655(A)(l) and 673(l) of the Corporations Act by modifying section 609 of the Corporations Act to ensure that the ability to lodge a withdrawal request under the withdrawal facility offered by the Fund does not by itself give unitholders a relevant interest in the securities held by the Fund. The instrument needs to be taken into account by unitholders in relation to their obligations under the takeover and substantial holder notices regimes in the Corporations Act 2001.

Ongoing disclosure – ASIC has granted relief under *ASIC Corporations (Relief to Facilitate Admission of Exchange Traded Funds) Instrument 2024/147* under Section 1020F(1)(a) of the Corporations Act from the ongoing disclosure requirements in section 1017B on the condition that the Responsible Entity complies with the continuous disclosure requirements in section 675 of the Corporations Act as if the Fund was an unlisted disclosing entity.

Periodic Statements – ASIC has granted *ASIC Corporations (Periodic Statement Relief for Quoted Securities) Instrument 2024/14* which exempts the Responsible Entity from certain periodic statement requirements which will apply in relation to units acquired on the ASX. In particular, the Responsible Entity is not required to include unit purchase or sale price information or return on investment information where it is unable to determine such information provided the Responsible Entity explains why this information is not included and how it can be obtained or calculated. In addition, the Instrument requires the Responsible Entity to provide information about the performance of the Fund relative to its investment objective.

Cooling-off period

Investors do not have cooling-off rights in respect of units in the Fund (regardless of whether they are purchased on the ASX or applied directly with the Responsible Entity (via the Registry).

Declarations

By acquiring units on the ASX, you represent and warrant that:

- you have received, read and understood the PDS for the Fund (as may be updated from time to time), and you agree to be bound by the terms of the PDS;
- you agree to be bound by the Constitution (as amended from time to time);
- if requested, you will provide additional information and assistance, and comply with all reasonable requests, to facilitate compliance of AML Requirements by the Responsible Entity and the Investment Manager (as applicable);
- you agree to personal information about you being collected, used and disclosed in accordance with the Responsible Entity's privacy policy, First Sentier Investors' Privacy Notice and the privacy statement in this PDS below; and
- you agree to receive communications for the Fund electronically unless you have specifically elected or requested otherwise.

Privacy

The Registry on behalf of the Responsible Entity may collect personal information from you during the application process to administer your investment and comply with any relevant laws. If you do not provide the Responsible Entity with your relevant personal information, we will not be able to do so. In some circumstances we may disclose your personal information to the Responsible Entity's related entities or service providers that perform a range of services on our behalf and which may be located overseas.

Privacy laws apply to the Responsible Entity's handling of personal information and it will collect, use and disclose your personal information in accordance with its privacy policy, which includes details about the following matters:

- the kinds of personal information the Responsible Entity collects and holds;
- how the Responsible Entity collects and holds personal information;
- the purposes for which the Responsible Entity collects, holds, uses and discloses personal information;
- how you may access personal information that the Responsible Entity holds about you and seek correction of such information (note that exceptions apply in some circumstances);
- how you may complain about a breach of the Australian Privacy Principles (**APP**), or a registered APP code (if any) that binds us, and how the Responsible Entity will deal with such a complaint; and
- whether the Responsible Entity is likely to disclose personal information to overseas recipients and, if so, the countries in which such recipients are likely to be located if it is practicable for it to specify those countries.

The Responsible Entity's privacy policy is publicly available at www.perpetual.com.au or you can obtain a copy free of charge by contacting the Responsible Entity. First Sentier Investors' Privacy Notice is available at www.firstsentierinvestors.com.au.

If you invest indirectly through a Service Operator, the Responsible Entity does not collect or hold your personal information in connection with your investment in the Fund. Please contact your Service Operator for more information about their privacy policy.

Anti-Money Laundering and Counter Terrorism Financing

The Anti-Money Laundering and Counter-Terrorism Financing Act 2006 (**AML Act**) and other applicable anti-money laundering and counter terrorism laws, regulations, rules and policies which apply to the Responsible Entity (**AML Requirements**), regulate financial services and transactions in a way that is designed to detect and prevent money laundering and terrorism financing. The AML Act is enforced by the Australian Transaction Reports and Analysis Centre (**AUSTRAC**). In order to comply with the AML Requirements, the Responsible Entity is required to, amongst other things:

- verify your identity and source of your application monies before providing services to you, and to re-identify you if it considers it necessary to do so; and
- where you supply documentation relating to the verification of your identity, keep a record of this documentation.

The Responsible Entity and any agent acting on its behalf reserve the right to request such information as is necessary to verify your identity and the source of the payment. In the event of delay or failure by you to produce this information, the Responsible Entity may refuse to accept an application and the application monies relating to such application or may suspend the payment of withdrawal proceeds if necessary to comply with AML Requirements applicable to it. Neither the Responsible Entity nor its agents shall be liable to you for any loss suffered by you because of the rejection or delay of any subscription or payment of withdrawal proceeds.

The Responsible Entity has implemented several measures and controls to ensure it complies with its obligations under the AML Requirements, including carefully identifying and monitoring unitholders. Because of the implementation of these measures and controls:

- transactions may be delayed, blocked, frozen or refused where the Responsible Entity has reasonable grounds to believe that the transaction breaches the law or sanctions of Australia or any other country, including the AML Requirements;
- where transactions are delayed, blocked, frozen or refused the Responsible Entity or its agents are not liable for any loss you suffer (including consequential loss) caused by reason of any action taken or not taken by them as contemplated above, or because of the Responsible Entity's compliance with the AML Requirements as they apply to the Fund; and
- the Responsible Entity or any agents acting on its behalf may from time to time require additional information from you to assist it in this process.

The Responsible Entity has certain reporting obligations under the AML Requirements and is prevented from informing you that any such reporting has taken place. Where required by law, the Responsible Entity may disclose the information gathered to regulatory or law enforcement agencies, including AUSTRAC. Neither the Responsible Entity nor its agents are liable for any loss you may suffer because of the Responsible Entity's compliance with the AML Requirements.

Consents

The Investment Manager, Northern Trust, Citigroup, MUFG Corporate Markets and MUFG Corporate Markets (AU) have given consent, which has not been withdrawn as at the Issue Date of this PDS, to being named in the form and context in which they are named and the statements about them in the form and context they appear in this PDS.

Conflicts of interest

First Sentier Investors may be the investment manager of other funds not described in this PDS. Entities within the Perpetual Group may act in various capacities (such as responsible entity, trustee and custodian) for other funds or accounts. First Sentier Investors and the Perpetual Group have implemented policies and procedures to identify and where possible mitigate or avoid the conflict.

Enquiries and complaints

If you have any enquiries regarding the Fund, please contact Investor Services at 1300 553 490 for more information.

The Responsible Entity has established procedures for dealing with complaints. If an investor has a complaint, they can contact the Responsible Entity and/or Investor Services during business hours, using the contact details provided in this PDS. We will endeavour to resolve your complaint fairly and as quickly as we can. We will respond to your complaint within the maximum response timeframe of 30 days. If we are unable to respond within the maximum response time because we have not had a reasonable opportunity to do so, we will write to you to let you know of the delay.

All investors (regardless of whether you hold units in the Fund directly or hold units indirectly via a Service Operator) can access the Responsible Entity's complaints procedures outlined above. If investing via a Service Operator and your complaint concerns the operation of the Service Operator then you should contact the Service Operator directly. If an investor is not satisfied with the final complaint outcome proposed, any aspect of the complaints handling process or a delay in responding by the maximum response time, the Australian Financial Complaints Authority (**AFCA**) may be able to assist. AFCA operates the external complaints resolution scheme of which the Responsible Entity is a member. If you seek assistance from AFCA, their services are provided at no cost to you.

You can contact AFCA on 1800 931 678, or by writing to:

Australian Financial Complaints Authority Limited
GPO Box 3
Melbourne VIC 3001
Email: info@afca.org.au
Website: www.afca.org.au

Terms used in this PDS

ABN - Australian Business Number.

AFCA - Australian Financial Complaints Authority.

AMIT - Attribution Managed Investment Trust.

AML Act - *Anti-Money Laundering and Counter-Terrorism Financing Act 2006*.

AML Requirements - obligations under the *Anti-Money Laundering and Counter-Terrorism Financing Act 2006* and other regulations, rules and policies which apply.

AMMA Statement - AMIT member annual statement.

APP - Australian Privacy Principles.

AQUA Rules - Schedule 10A of the ASX Operating Rules, and related procedures as amended, varied or waived from time to time.

ASIC - the Australian Securities and Investments Commission.

ASX - Australian Securities Exchange, being the financial market operated by ASX Limited ABN 98 008 624 691.

ASX Listing Rules - the official listing rules of the ASX, as amended, varied or waived from time to time.

ASX Operating Rules - the operating rules of the ASX as amended, varied or waived from time to time.

ATO - Australian Tax Office.

AUSTRAC - Australian Transaction Reports and Analysis Centre.

Australian Unitholders - Unitholder is a resident of Australia for tax purposes.

Authorised Participant(s) - appointed by the Responsible Entity to assist with providing liquidity on the ASX.

Business Day - a day that is a trading day for the purposes of the ASX Operating Rules.

CGT - capital gains tax.

CHESS - Clearing House Electronic Sub-Register System.

CHESS Sub-Register - the sub-register from which units may be purchased or sold on the ASX.

Citigroup, Prime Broker or Custodian - Citigroup Global Markets Limited.

Constitution - the constitution of the Fund, as amended from time to time.

Conversion - the process of a unitholder moving units between the CHESS Sub-Register and the Issuer Sub-Register, and vice versa, and '**Convert**' has the same meaning.

Corporations Act - *Corporations Act 2001 (Cth)*.

CRS - OECD Common Reporting Standards.

DRP - distribution reinvestment plan.

ESG - environmental, social and governance.

FATCA - Foreign Account Tax Compliance Act.

Fund - First Sentier Geared Australian Share Fund Complex ETF ARSN 667 151 037.

GAV - gross asset value means the total value of the assets of the Fund determined in accordance with the accounting standards and the Constitution.

Gearing Ratio - the Fund's borrowing on any day (adjusted for any dividends to be received by the Fund and the value of unsettled trades) divided by the total market value of the assets of the Fund, expressed as a percentage.

GST - goods and services tax as defined in the *A New Tax System (Goods and Services Tax) Act 1999 (Cth)* as amended from time to time.

HIN - Holder Identification Number, a unique number used to identify the owner of units that are on the CHESS Sub-Register.
